

RADOX® Modular cable assembly (mCAY)

HUBER+SUHNER has invested in building in-house assembly capabilities using EMPT technology, alongside traditional crimping. This enables production to meet market demand promptly and efficiently for first prototype needs and selected small serial deliveries.

Features

- Modularity
- Full Automotive Validation
- RADOX® technology
- Robust design
- Tested End-of-Line

Benefits

- Intuitive configuration
- Accelerated homologation process
- Easy integration into high voltage systems
- System usage without corrugated tubes

USPs

- Short lead-times
- Reduced development efforts on customer side
- Improvement in time-to-market
- Suitable for harsh environments
- Ready made off-the-shelf product

Available:

EV-C, HVP HD 1400, HVP HD 1000, IPT HD Powerbolt

In preparation:

HVA HD 400, Powerlok GEN2
