

# Wireless infrastructure

Solutions for remote radios  
and cell sites

Edition 06/2025

The background of the image is a dark blue gradient. It features a complex network of glowing blue lines that intersect at several points. These intersection points are marked with bright, circular blue nodes that have a soft glow. The lines vary in thickness and opacity, creating a sense of depth and connectivity. The overall aesthetic is futuristic and technological, suggesting a global or digital network.

**Connecting – today and beyond**

HUBER+SUHNER is a global company with headquarters in Switzerland which develops and manufactures components and system solutions for electrical and optical connectivity. With cables, connectors and systems – developed from the three core technologies of radio frequency, fiber optics and low frequency – the company serves customers in the communication, transportation and industrial sectors.

The products deliver high performance, quality, reliability and long service life – even under the toughest of conditions. The company's global production network, combined with group companies and agencies, ensures that HUBER+SUHNER maintains a close relationship with its customers in over 80 countries.

At the heart of our offering is a broad range of products that can be relied on to meet high quality standards, backed up by flexible, dependable services with fast response times and excellence in delivery performance. In the wireless market, we concentrate on solutions that allow mobile operators to reduce their total cost of ownership and to make their mobile network futureproof and reliable.

## HUBER+SUHNER provides complete installation solution

HUBER+SUHNER is the global leader for remote radio installation solutions. We have a comprehensive offering of Fiber-To-The-Antenna (FTTA), Power-To-The-Antenna (PTTA) and Hybrid-To-The-Antenna (HTTA) products, which are tailored to the customer's needs. We advise operators about which installation methods are available and what their advantages are. We are experts on how to make savings on installation costs and how expensive follow-up costs can be saved. HUBER+SUHNER implements future-proof passive cable network infrastructures, which are compatible with all system vendor products and endure the future generations of active equipment.

---

## MASTERLINE fiber optic cabling systems of HUBER+SUHNER

HUBER+SUHNER offers 3 different FTTA cabling systems, MASTERLINE Classic (MLC), MASTERLINE Extreme (MLE) and MASTERLINE Ultimate (MLU). MASTERLINE cabling systems of HUBER+SUHNER are the most efficient and easiest-to-install fiber optic products available on the market. All MASTERLINE fiber optic cabling systems of HUBER+SUHNER use glass-armoured multifiber loose tube cables (6 to 48 fibers). With a short fiber optic jumper the cabling systems are quickly and easily connected to the vendor specific RRH interfaces.

MASTERLINE Ultimate has a compact, pre-connectorised and factory-sealed connector head with 12 Q-ODC-2 sockets. The robust connector head with an integrated pulling eye allows easy cable lifting. The encapsulated connector head can be directly attached to the mast with a single „click“ at a pre-mounted adapter plate. Short easy-to-install Q-ODC fiber optic jumpers connect the RRH interface.

MASTERLINE Extreme has a robust and very compact divider, which divides the fibers in 6 or 12 single cables terminated with Q-ODC-2 extension connectors. The very compact divider requires only a small space on the mast, minimises the wind-load and can be fed through small holes. Short easy-to-install Q-ODC fiber optic jumpers connect the RRH interface.

MASTERLINE Classic has a divider, which divides the fibers in 6, 12, 18 or 24 single cables terminated with LC duplex connectors. The divider is fixed at a distribution box and the LC duplex connectors connected to adapters. Short LC duplex jumper connect the RRH interfaces.

## MASTERLINE hybrid cabling systems of HUBER+SUHNER

Hybrid cables, combining optical fiber and DC power for remote radios, have evolved as the dominating solution in North America, Australia and Europe. MASTERLINE hybrid cabling systems of HUBER+SUHNER are the most efficient and easiest-to-install products available on the market. Mobile operators on four continents verified that MASTERLINE Hybrid can be installed in approximately half of the time of competitive hybrid solutions based on corrugated coax cable designs. The factory-terminated „plug & play“ system in combination with a highly flexible and easy-to-route cable makes the HUBER+SUHNER solution the hybrid cable of choice for operators, system vendors and installers alike.

HUBER+SUHNER offers 3 different hybrid cabling systems, MASTERLINE Classic Hybrid (MLCH), MASTERLINE Extreme Hybrid (MLEH) and MASTERLINE Ultimate Hybrid (MLUH). All HUBER+SUHNER's MASTERLINE Hybrid cabling systems use highly flexible hybrid cables with a multifiber loose tube cables (6 to 36 fibers) and up to 18 copper conductors. With a short fiber optic jumper the cabling systems are quickly and easily connected to the vendor specific RRH interfaces.

MASTERLINE Ultimate Hybrid has a compact, pre-connectorised and factory-sealed connector head with up to 6 Q-ODC-2 sockets and up to 6 power sockets. The robust connector head with an integrated pulling eye allows easy cable lifting. The encapsulated connector head can be directly attached to the mast with a single „click“ at a pre-mounted adapter plate. Short easy-to-install Q-ODC fiber optic and power jumpers connect the RRH interface.

The most innovative hybrid cabling system of HUBER+SUHNER for remote radio installation became even more innovative by offering capability to deliver 230 VAC up the mast, allowing much longer cabling with significant cost savings on cables and more efficient power transfer. The pre-connectorised factory-sealed hybrid systems supports up to 12 RRHs and connects the remote radios with easy-to-install Q-ODC fiber optic and power jumpers. The encapsulated connector head can be directly attached to the mast with a single „click“ at a pre-mounted adaptor plate. These unique features make MASTERLINE Ultimate Hybrid High Voltage the only in-class product offering all the advantages of the MASTERLINE Ultimate family together with high voltage conformity confirmed by the worldwide recognised CE marking. For extra safety the whole head is protected by removable cover.

MASTERLINE Extreme Hybrid has a robust and very compact divider, which divides the fibers in up to 18 single cables terminated with Q-ODC-2 extension connectors and up to 9 power cables. The very compact divider requires only a small space on the mast, minimises the wind-load and can be fed through small holes (80/100 mm diameter). Short easy-to-install Q-ODC fiber optic and power jumpers connect the RRH interface.

MASTERLINE Classic Hybrid has a divider, which divides the fibers in 6, 12, 18 or 24 single cables terminated with LC duplex connectors. The hybrid cable is fed into a distribution box. The LC duplex connectors are connected to adapters and the conductors terminated to screw terminals. Short LC duplex and power jumper connect the RRH interfaces.

# Work with the leader for remote radio installation solutions

## MASTERLINE cabling systems of HUBER+SUHNER: reduced installation cost, flexibility and scalability

### Reduced installation costs

MASTERLINE cabling systems are more cost-effective, because only 1 cable is laid instead of 6 or more. As the number of RRHs rises, cost efficiency rises accordingly. The length of time required for installation is a major cost factor. Cabling systems of HUBER+SUHNER are pre-connectorised „plug & play“ solutions and can be connected directly with the active equipment. In addition, the multi-riser cables are more rigid than individual cables due to their increased diameter, meaning that the securing clips can be installed at intervals of between 1.5 and 2 meters. Empirical data indicates that cable installation times can be reduced by between a third and a half (compared to discrete cables). With our latest hybrid cabling system MASTERLINE Ultimate Hybrid High Voltage the installation cost can be reduced further. The capability to deliver 230 VAC up the mast, allows significant cost savings on cables due to more efficient power transfer.

### Flexibility

Only the short jumper cables may need to be renewed when upgrading or replacing the RRH. Most of the installed passive infrastructure remains unaffected. This means that the installation is independent of the system and manufacturer and offers maximum flexibility in terms of evolution within the network.

### Scalability

Additional RRHs must be installed when setting up new systems or frequency bands. During initial installation, 12 or 24 integrated fiber optic cores can be laid instead of 6, so that the necessary fibers are already in place if new services are being set up at a later date. No expensive new cable installations are required – all that is needed is a number of additional jumpers.

## Total cost of ownership analysis

HUBER+SUHNER offers total cost of ownership (TCO) analysis for network upgrades and expansions. In close co-operation with mobile operators we have developed a sound understanding of real costs and roll out issues associated with remote radio systems. The optimum installation solution depends very much on the legacy infrastructure, on the installation phase, on the material supply chain and on future expansion plans. HUBER+SUHNER has consulted with network deployment managers across the globe on how to save millions on installation and material costs by deploying reliable cable infrastructures which are easy and cost effective to install and which fulfill today's and tomorrow's network deployment requirements.

Example: 50 m remote radio head installation in UK

TCO calculation model of HUBER+SUHNER provides a country/operator specific TCO comparison between the different installation solutions.

Please contact your sales representative for an individualised TCO calculation.

## Power design tool for remote radios – Powering 5G networks

Mobile networks are drawing a lot of power. 5G networks will require even more power to bring the benefits it promises. This results in an near duplication of the power requirement per active equipment. The power design tool supports system engineers to correctly dimension DC power cables or to verify the limits of an existing power supply system. It is a powerful and easy-to-use tool to answer the following questions:

What is the maximum allowable RRH power consumption at given cable configuration?

What is the minimum required cable cross section to supply a specific RRH at a given tower height?

What is the maximum allowed cable length of a pre-specified cable cross section and RRH? E. g., a 1000 W remote radio with 10 mm<sup>2</sup> power cable.

**Make your own power dimensioning under**

# Quick guide on installation solutions

**Discrete fiber feeders for single RRH**

One fiber optic feeder per RRH needed  
 Default solution of system vendors  
 Not scalable and not future-proof  
 Vendor specific cables and connectors

**Discrete power feeders for single RRH**

One power feeder cable per RRH needed

**MASTERLINE Ultimate (MLU)**

Multi-riser cable with compact connector head up to 12 RRHs  
 Pre-connectorised fiber optic cabling system with up to 12 outdoor socket connectors (Q-ODC)  
 Installation friendly plug & play system with outdoor connectors  
 Low wind-load and space efficient  
 Supports multi-vendor installs

**MASTERLINE Ultimate Power (MLUP)**

Multi-wire power cable with compact power connector head for up to 6 RRHs  
 Pre-connectorised power cabling system with up to 6 power socket connectors (IP68)

**MASTERLINE Extreme (MLE)**

Multi-riser cable with compact divider for up to 12 RRHs  
 Pre-assembled fiber optic cabling system with up to 12 outdoor connectors (Q-ODC)  
 Installation friendly plug & play system with outdoor connectors  
 Low wind-load and space efficient  
 Supports multi-vendor installs

**MASTERLINE Extreme Power (MLEP)**

Multi-wire power cable with compact divider for up to 6 RRHs  
 Pre-assembled power cabling system with up to 6 power socket connectors (IP68) or open-end wires

**MASTERLINE Classic (MLC)**

Multi-riser cable with distribution box for up to 24 RRHs  
 Pre-assembled fiber optic cabling system with up to 12 indoor connectors (LC duplex)  
 Requires handling of indoor fiber optic connectors  
 Supports multi-vendor installs

**Multicore Power supply cable with distribution box**

2, 6 or 12 wire shielded power supply cable with distribution box for up to 6 RRHs  
 Power distribution box with optional surge protection device and/or circuit breaker

# Quick guide on installation solutions

## MASTERLINE Ultimate Hybrid High Voltage (MLUH HV)

Hybrid riser cable with compact connector head high voltage (230 VAC) CE conformity  
 Suitable for 230 VAC power supply  
 Allowing much longer cabling length  
 Significant cost savings on cables  
 More efficient power transfer  
 Pre-connectorised factory-sealed hybrid cable system for 12 RRH  
 Mounting bracket for easy mast-, pole-, and wall-installation  
 Integral earth point  
 Equipped with protection cover for cable exits

→ page 92

## MASTERLINE Ultimate Hybrid (MLUH)

Hybrid riser cable with compact connector head for up to 6 RRHs  
 Pre-connectorised hybrid cabling system with up to 6 fiber optic outdoor socket connectors (Q-ODC) and up to 6 power socket connectors (IP68)  
 Optional with Q-ODC-12 connector for up to 18 fiber optic interfaces  
 Ultimate „plug & play” solution  
 Fast and safe installation  
 Low wind-load and space efficient  
 Supports multi-vendor installs  
 Hybrid cable combines glass fiber cables and copper conductors within a single cable

→ page 78

## MASTERLINE Extreme Hybrid (MLEH)

Hybrid riser cable with compact divider for up to 9 RRHs  
 Pre-assembled hybrid cabling system with up to 18 fiber optic outdoor connectors (Q-ODC) and up to 9 power socket connectors (IP68)  
 Most commonly installed hybrid product globally  
 Fast and safe installation  
 Low wind-load and space efficient  
 Supports multi-vendor installs  
 Hybrid cable combines glass fiber cables and copper conductors within a single cable

→ page 102

## MASTERLINE Classic Hybrid (MLCH)

Hybrid riser cable with distribution box for up to 6 RRHs  
 Pre-assembled hybrid cabling system with up to 12 fiber optic indoor connectors (LC duplex) and up to 6 pairs of copper wires  
 Hybrid distribution box with optional surge protection device and/or circuit breaker  
 High wind-load compared with MLUH and MLEH  
 Elaborate box installation at mast required  
 Supports multi-vendor installs  
 Hybrid cable combines glass fiber cables and copper conductors within a single cable

→ page 118

# Discrete fiber optic feeders for single RRH

---

The solution with discrete fiber and power cables supports every type of cell site installation, whether the remote radios are co-located (mast-top installation) or distributed on rooftops of buildings.

HUBER+SUHNER has a leading role in the design and manufacturing of harsh environment connectors (e.g. ODC, FullAXS, Q-ODC or Q-XCO) and cable assemblies for remote radio systems. The installation method with discrete cables is the default solution of mobile system vendors.

HUBER+SUHNER is an approved and qualified cable assembly supplier for the majority of the tier 1 and tier 2 system vendors.

# Discrete fiber feeders for single RRH

## Features

- FTTA feeders for all common RRH models and systems
- Ruggedised design and installation proof
- Standard assemblies and customised lengths, available with short lead-time
- Cable diameter 4.8 mm, 5.5 mm
- All cables rodent resistant, CPR compliant and UL (OFNR) approved
- All cable assemblies factory-terminated and tested
- Anatel approved cables, available on request

## Specifications

Outer cable diameter	4.8 mm	5.5 mm
Jacket material	LSFH™	
Cable tensile strength (service/during installation)	500/1000 N	
Cable crush resistance (long-term/short-term)	6000/20 000 N/dm	
Temperature range	-40 to +75 °C	
Flame resistance	IEC 60332-1, IEC 60332-3-24, UL1666	
UV resistant	yes	

## HUBER+SUHNER cables are deployed on a global scale

Year by year, HUBER+SUHNER produces tens of thousands of FTTA feeder cables and is a leading global supplier to major system vendors and operators. Our customers value our quality products which are manufactured on all continents close to the local markets.

HUBER+SUHNER is also an innovation leader for remote radio interfaces and is the owner of globally successful products like ODC, Q-ODC and Q-XCO.

# MASTERLINE Ultimate (MLU)

## Multi-riser cable with compact connector head

MASTERLINE Ultimate is the most innovative fiber optic cabling system of HUBER+SUHNER for remote radio installations. The pre-connectorised factory-sealed fiber optic systems support up to 12 RRHs and connect the remote radios with easy-to-install Q-ODC fiber optic jumpers.

The robust connector head with an integrated pulling eye allows easy cable lifting without the need for hoisting grips. The encapsulated connector head can be directly attached to the mast with a single „click“ at a pre-mounted adaptor plate.

MASTERLINE Ultimate is available with Q-ODC-12/24 (MLUQ), a 12 or 24 fiber outdoor connector, instead of a hardwired multi-riser cable. MLUQ allows the use of RRH/antenna pole mount frames to further reduce on-site installation time.

These unique features make MASTERLINE Ultimate the best-in-class product in terms of ease of mast-top installation, installation robustness and efficiency.

# MASTERLINE Ultimate (MLU)

# MASTERLINE Ultimate (MLU)

## Features

- Pre-connectorised factory-sealed „plug & play“ fiber optic cabling system for up to 12 RRHs
- Robust connector head with 6 or 12 Q-ODC sockets
- Connects the RRH with easy-to-install Q-ODC fiber optic jumpers
- Integrated pulling eye for easy cable lifting
- Loose tube cables with up to 24 fibers, rodent protected and UV resistant and CPR compliant
- Connectors numbered for easy channel identification
- Easy and time-saving installation

## Specifications

Number of Q-ODC connector socket		6 or 12 (sepcifications see page 145)
Dimensions L x W x H	enclosure without cover	293 x 110 x 46 mm
	enclosure with cover	460 x 160 x 110 mm
Temperature range	during installation	-10 up to +50 °C
	in service	-40 up to +75 °C
Ingress protection		IP67
Impact resistance		IK 07
UV resistant for outdoor use		ISO 4892-3
Cable type		glass-armoured multifiber loose tube cable
Jacket material		LSFH™, black
Cable diameter		7.0 mm
Minimum bending radius	during installation	110 mm
	in service	70 mm
Cable flame resistance	IEC 60332-1 IEC 60332-3-24	passed
CPR compliant		class D <sub>co</sub> , s1a, d0, a1
Protection tube BTS side	outer diameter	36 mm

MASTERLINE Classic with LC uniboot at BTS side

Protective cover for connector is optional available

Up to 80 m supplied as air ring and for longer cable systems on a double-flange reel.

Option:

Customizable in length

# MLU installation

Easiest-to-install fiber optic product available on the market.

## Installation features

### Pulling

The robust connector head with integrated pulling eye allows for easy cable lifting without the need for hoisting grips. The small form factor allows pulling of the connector head even inside of a mono pole.

### Mounting bracket

The MLU connector head can be locked easily to the mounting bracket. The bracket has provision for fixation either to a mast or directly onto a wall.

### Q-ODC push-pull connector

The Q-ODC push-pull connector allows for a quick and reliable connection of the remote radio head with jumper cables. The Q-ODC connector is used by an ever-growing number of operators and OEMs world-wide.

### Protection tube on BTS side

Supplied with robust protection tube to protect the fibers breakouts on BTS side from damage during installation. Can be easily removed by pulling the rip cord.

## NEW: MASTERLINE Ultimate with ODC-2

MASTERLINE Ultimate fiber optic cabling system is also available with ODC-2 connector sockets.

The ODC-2 connector has a screwed locking mechanism, instead a push-pull coupling mechanism like Q-ODC-2 connector.

Specifications see page 149.

# MASTERLINE Ultimate (MLU)

## Q-ODC connectors

Q-ODC plug on the jumper

Q-ODC socket on MLU head

### Features

Robust push-pull coupling mechanism –  
two clearly defined mating states  
Highest outdoor installation safety  
Available for all types of RRH  
Waterproof, dust proof and corrosion resistant;  
does not require secondary wrapping

Specifications see page 144.

## Mating/un-mating sequences

Push plug connector slightly into socket connector, rotate to find keying position, push connector to mate.

Mated – connector snaps in and is fully strain relieved.

Pull coupling ring to un-mate.

## Easiest-to-install fiber cabling system

The robust connector head with an integrated pulling eye allows easy cable lifting. The encapsulated connector head can be directly attached to the mast with a single «click» at a pre-mounted adaptor plate.

MLU offers highest variability and security in connecting remote radio units to the fiber optic network. With the unique shape of the top end and the additional protection cover this new connection system is providing a streamline shaped appearance that provides less wind load.

These unique features make MASTERLINE Ultimate the best-in-class product in terms of ease of mast-top installation, installation robustness and efficiency.

# MASTERLINE Ultimate (MLU)

## Q-ODC RRH jumpers

### Features

- Compatible with MLE, MLEH, MLU and MLUH terminated with Q-ODC
- Ruggedised and robust RRH jumper cable – easy and reliable to install
- Available for all types of RRH
- Cable diameter 4.8 mm, 5.5 mm or 7 mm
- Standard lengths of 2, 5 and 10 m, customised lengths available
- Ingress protection IP68 (Q-ODC)

## Ordering information

### Q-ODC plug RRH jumpers to other OEM interfaces

Please contact HUBER+SUHNER for Q-ODC plug RRH jumpers for other OEM interfaces which are not listed above.

# MASTERLINE Ultimate with Q-ODC-12/24 (MLUQ)

## Features

- Pre-connectorised factory-sealed “plug & play” fiber optic cabling system for up to 12 RRHs
- Modular RRH installation solution – connector head and multifiber cable can be installed separated
- Q-ODC-12 or Q-ODC-24 connectivity between the connector head and multifiber cable
- Connectorised multifiber cable can be installed through a hole with a minimum diameter of only 22 mm
- Robust connector head with 6 or 12 Q-ODC-2 sockets to connect the RRH with Q-ODC-2 fiber optic jumpers
- Easy and time-saving installation

## Specifications

<b>Connector head</b>		
Number of Q-ODC-2 connector socket		6 or 12
Number of Q-ODC-12/24 connector socket (reverse plug)		1
Dimensions L × W × H	enclosure without cover	293 × 110 × 46 mm
	enclosure with cover	460 × 160 × 110 mm
Temperature range	during installation	-10 up to +50 °C
	in service	-40 up to +75 °C
Ingress protection		IP67
Impact resistance		IK 07
UV resistant for outdoor use		ISO 4892-3
Mounting bracket material		stainless steel

<b>Multifiber cable</b>		
Cable type		glass-armoured multifiber loose tube cable
Jacket material		LSFH™, black
Cable diameter		7.0 mm
Minimum bending radius	during installation	110 mm
	in service	70 mm
Fire propagation		IEC 60332-1 and IEC 60332-3-25
CPR compliant		class D <sub>co</sub> s1a, d0, a1

Protective cover for connector is optional available

# MASTERLINE Ultimate installation

	<p><b>Hook in MLU head to mounting bracket</b> The MLU connector head can be easily hooked in to the pre-mounted bracket and firmly fixed with two captive screws at the bottom of the connector head.</p>
	<p><b>Lift the connectorised multifiber cable</b> Use the integrated pulling eye at the Q-ODC12/24 connector cap to lift the multifiber cable, connectorised with Q-ODC-12/24 extension, up to the mast.  Connect the Q-ODC-12/24 extension to the Q-ODC-12/24 socket (reverse plug) at the bottom of the MLUQ.</p>

## Modularity for reduced on-site installation

MASTERLINE Ultimate with Q-ODC-12/24 (MLUQ) is a modular cabling system which allows the use of RRH/antenna pole mount frames. A multifiber cable connectorised with Q-ODC-12/24 extension on the top side is installed at the mast or pole separately from the RRH installation.

The operator builds its frames with the RRHs, antennas and MLUQ connector head at their logistics centers. Usually 3 or 4 Radios are installed on a pole mount frame (a frame per sector or frequency). At the site the whole radio/antenna frame is lifted up and fixed to the mast and with one click the MLUQ connector head (for up to 12 RRHs) gets connected via the Q-ODC-12/24 connector and multifiber cable fed down to the BBU.

# MASTERLINE Ultimate (MLUQ)

## Q-ODC-12/Q-ODC-24 connector

### Features

- Up to 24 fibers, single-mode or multimode
- Compact design with MT ferrules
- Robust push-pull coupling mechanism – two clearly defined mating states
- Highest outdoor installation safety
- Waterproof, dust proof and corrosion resistant
- Waterproof protection caps available

Q-ODC-12/24 extension terminated to the multifiber cable and Q-ODC-12/24 socket (reverse plug) on the MLUQ enclosure

Specifications on page 147.

## Mating/unmating sequences

### Un-mate protection cap with pulling eye

Pull back metal coupling ring at the Q-ODC-12/24 protection cap and remove protective cap

### Mating sequence

Push extension connector slightly into socket (reverse plug) connector, rotate to find keying position, push connector to mate. Use arrows on the boot for pre-alignment. Mated – connector snaps in and is fully strain relieved.

### Un-mating sequence

Push black rubber coupling ring at the MLUQ socket (reverse plug) to unmate. Replace dust protection caps.

## Q-ODC-2 connector

### Features

- 2 fibers, single-mode or multimode
- Compact design with 2 × 1.25 mm ferrules
- Robust push-pull coupling mechanism – two clearly defined mating states
- Highest outdoor installation safety
- Waterproof, dust proof and corrosion resistant
- Waterproof protection caps available
- Fulfills performance standard IEC 61753-1 Cat. E

Specifications and mating/unmating sequences on page 143.

SFP/SFP+ transceivers for different protocols, data rates and power budgets.		See transceiver selection guide on page 260	259	

# MASTERLINE Ultimate Power (MLUP)

## Multi-wire power cable with compact connector head

MASTERLINE Ultimate Power enables a power supply installation with only one power cable, instead of 6 individual power cables. The compact pre-connectorised head supplies  $-48$  Vdc for up to 6 RRHs.

Power jumpers, available in different lengths, connect the RRHs with  $-48$  Vdc. A pre-laced hoisting grip below the robust connector head allows for easy cable lifting. The encapsulated connector head can be directly attached to the mast at a pre-mounted adaptor plate.

# MASTERLINE Ultimate Power (MLUP)

# MASTERLINE Ultimate Power (MLUP)

## Features

- Pre-connectorised factory-sealed power cabling system for up to 6 RRHs
- Modular „plug & play“ system with 6 power connectors
- Highly flexible 12-core power cable 6 mm<sup>2</sup> to 16 mm<sup>2</sup> and AWG 10 to AWG 6
- Hoisting grip for cable lifting
- Mounting bracket for easy mast-, pole-, and wall-installation
- Space-efficient, low wind-load
- Integral earth point which can be connected to an earth lead with M8 ring terminal

## Connector head specifications

Number of power connector (rugged circular plastic socket)	6	
Maximum current rating	up to 42 A per power socket (depending on the conductor cross section selected)	
Dimensions L x W x H	310 x 90 x 97 mm	
Ambient temperature range	during installation	-10 up to +50 °C
	in service	-40 up to +75 °C
Ingress protection (IEC 60529)	IP67	
Impact resistance (IEC 62262)	IK 10

## Power connectors

plug at

### Features

- Rugged circular plastic plug connector for remote radio installations
- Machined crimp contacts  $\varnothing$  3.6 mm for high current
- Bayonet coupling system for easy and quick mating
- 2 wire shielded copper cable with cross section of 4 or 6 mm<sup>2</sup>
- 3-pol connector for 2-wire shielded copper cable

Power connector flange socket at the MLUH connector head

The bayonet coupling system enables a simple and fast mating. With only a 1/3 twist of the coupling ring, connectors are mated with an audible and tactile „click“. The machined 3.6 mm crimp contacts ensure a vibration safe termination and a high current rating.

## Mating/unmating sequences

Twist the coupling ring of the plug connector to remove protecting cap as shown.

Push plug connector slightly into flange connector, rotate to find keying position, twist coupling ring of the plug connector as shown.

Twist coupling ring as shown to unmate the plug connector.

## Power connector specifications

Maximum current rating	42 A (IEC), 44 A (UL), 30 A (CSA)
Rated voltage	230 V (IEC), 600 V (UL), 600 V (CSA)
Operating temperature	-40 to 105 °C (40/10/21 per NFF 61-030)
Flammability rating	UL 94 V0
Salt spray	> 500 hours
UV resistant for outdoor use	ISO 4892

# MASTERLINE Ultimate Power (MLUP)

## Y- and λ- Power Jumper

HUBER+SUHNER Y- and λ- Power Jumpers provide flexible installation options for efficiently delivering DC power to Remote Radio Heads (RRHs). The Y-Power Jumper allows for the connection of a single RRH with dual power feed or two RRHs with a single power feed, enhancing versatility. Meanwhile, the λ-Power Jumper facilitates easy upgrades of existing power installations to support high-power radios, ensuring seamless integration.

### Features

- Compatible with MLUP, MLEP and MLUH
- One Y-/λ-Piece design
- Terminated with a rugged circular plastic plug connector and blunt cut on the RRH side
- Blunt cut to blunt cut assembly options available
- 2 wire shielded copper section of 6 mm<sup>2</sup> to 16 mm<sup>2</sup> and AWG 10 to AWG 6
- Standard length 2, 5 and 10 m

# MASTERLINE Extreme (MLE)

## Multi-riser cable with compact divider

MASTERLINE Extreme with Q-ODC-2 connectors is an efficient solution in terms of ease of installation, cost and required space on the mast. The compact divider minimises the wind-load and can be fed through small holes (80 mm diameter). The ruggedised push-pull connector Q-ODC allows the installer to connect the RRH jumper cables with a single „click“, making it a genuine „plug & play“ cabling system. MLE with Q-ODC is available to support up to 12 remote radios.

MASTERLINE Extreme with one Q-ODC-12 connector allows the installer to connect 6 RRH jumper cables with a single „click“ and can even be installed through holes with a diameter of 20 mm. The Q-ODC-12 connector has the highest fiber density, based on the proven QN push-pull mating system and can connect 12 fibers in one mating step.

MASTERLINE Extreme is the preferred choice of network installers who require trouble free, reliable and efficient field deployments. MASTERLINE Extreme product family of HUBER+SUHNER is unique in the market and provides the best value for money.

# MASTERLINE Extreme (MLE)

# MASTERLINE Extreme (MLE) with Q-ODC

## Features

- Pre-assembled „plug & play“ cabling system
- Terminated with Q-ODC extension connectors on RRH side
- Adaptation to any RRH interface with Q-ODC plug jumpers
- BTS side terminated with LC uniboot connectors
- Ruggedised design with robust break-out cables
- Robust pulling tube for cable lifting
- Loose tube cables with 12 or 24 fibers, rodent protected and UV resistant and CPR compliant
- Connectors numbered for easy channel identification
- Easy and time-saving installation

## Specifications

Number of fibers		12	24
Build-in hole dimension divider BTS side		15.6 to 16.4 mm	
Outer diameter divider	RRH side	22.0 mm	28.0 mm
Tensile load on individual break-out cables		600 N	
Ingress protection with Q-ODC connector		IP67	
Break-out lengths		0.55/0.64 m	0.55/0.64/0.73/0.82 m
Break-out cable diameter		5 mm	
Cable type		glass-armoured multifiber loose tube cable	
Jacket material		LSFH™, black	
Cable diameter		7.0 mm	
Temperature range	installation	-10 to +50 °C	
	in service	-40 to +75 °C	
Fire propagation		IEC 60332-1 and IEC 60332-3-25	
CPR compliant		class D <sub>co</sub> s1a, d0, a1	
Flame resistance	IEC 60332-1	passed	
	IEC 60332-3-24		
Pulling tube with pulling eye	outer diameter	60 mm	
Protection tube BTS side	outer diameter	36 mm

# MASTERLINE Extreme (MLE) with Q-ODC

## Q-ODC connectors

Q-ODC plug on the jumper

### Features

- Robust push-pull coupling mechanism – two clearly defined mating states
- Highest outdoor installation safety
- Waterproof, dust proof and corrosion resistant; does not require secondary wrapping

Q-ODC extension on the MLE

## Mating/unmating sequences

Push plug connector slightly into extension connector, rotate to find keying position, push connector to mate.

Mated – connector snaps in and is fully strain relieved.

Pull coupling ring to unmate.

## Q-ODC RRH jumpers

### Features

- Compatible with MLE, MLEH, MLU and MLUH terminated with Q-ODC
- Ruggedised and robust RRH jumper cable – easy and reliable to install
- Available for all types of RRH
- Cable diameter 4.8 mm, 5.5 mm or 7 mm
- Standard lengths of 2, 5 and 10 m, customised lengths available

For ordering information, please see page 30.

---

## Multi-wire power cable with compact divider

MASTERLINE Extreme Power enables -48 Vdc power supply installation with only one power cable, instead of 6 individual power cables. The compact and robust factory sealed divider splits the DC power cable into 6 ruggedised break-out cables, which are linked to the RRHs – either directly or via extension jumpers in different lengths. With a hoisting grip, attached below the divider, the cable system is lifted up to the mast.

# MASTERLINE Extreme Power (MLEP)

# MASTERLINE Extreme Power (MLEP)

## Features

- Power cabling system for up to 6 RRHs
- Ruggedised powder coated aluminum with robust breakout cables
- Highly flexible 12-core power cable 6 mm<sup>2</sup> to 16 mm<sup>2</sup> and AWG 10 to AWG 6
- Break-out cable open-end or terminated with power connector
- Hoisting grip on the cable for cable lifting
- Supplied on double-flange reels for straight forward unspooling
- Integral earth point which can be connected to an earth lead with M8 ring terminal
- Optional connectorised power jumpers for higher installation flexibility

## Enclosure specifications

Number of break-out power cable	6	
Dimensions	length 253 mm Ø 76 mm	
Housing material	Powder coated aluminum	
Maximum current rating	up to 46 A per RRH (depending on the power cable)	
Temperature range	operation	-40 to +75 °C
	installation	-10 to +50 °C
Ingress protection (IEC 60529)	IP68	
Impact resistance (IEC 62262)	IK 10	
Flammability	UL94-V0	
UV resistance, ISO 4892-3 (methode A/cylce 1)	1000 h	

Hoisting grip for hybrid cable lifting

Mounting bracket with snap-in mechanism for quick and easy fixation of the divider housing. The UV resistant clips can be closed by hand without any tool.

# MASTERLINE Classic (MLC)

## Multi-riser cable with distribution box

MASTERLINE Classic uses separate multifiber and multi-conductor copper riser cables that are connected to mast mounted FTTA/PTTA distribution boxes which are then linked to the RRHs with short jumper cables. Traditionally multi-riser cables with distribution boxes have been the preferred solution for multi-RRH installations, however with the increasing number of remote radios per site mast space limitations and wind loading have become critical issues to operators.

Moreover some operators can incur extra leasing costs for every box placed on the mast, thus distribution box based systems are gradually being superseded by box-less solutions like MASTERLINE Extreme (see page 44). In general, the installation method with boxes is cost effective and offers installation flexibility but it does require handling and connecting of indoor LC connectors at the mast-top distribution box. Many operators want to avoid the risk of opening and maintaining mast-top boxes by non-trained or non-authorized persons.

# MASTERLINE Classic (MLC)

# MASTERLINE Classic (MLC)

## Features

- Ruggedised outdoor fiber distribution box
- Supports up to 24 remote radio heads
- Fitted with bend radius limiting mandrels
- Suitable for mounting on poles, walls and tower legs with round-, L-, V- and □-shape.
- Easy to mount and install with pre-mounted brackets
- Compatible with MASTERLINE Classic
- Fully electrically isolated
- Protective vent equalises pressure and prevents water condensation

- Ruggedised design with robust pulling tube
- Outdoor and indoor with high flame resistance
- Temperature range -40 up to +75 °C
- Ingress protection IP67 when installed
- Loose tube cables with up to 48 fibers, rodent protected and UV resistant and CPR compliant
- Both sides terminated with LC uniboot connectors
- Breakouts numbered for easy channel identification
- Easy and time-saving installation
- Each system factory tested

## Specifications

		MLC 12 fiber	MLC 24 fiber	MLC 36 fiber	MLC 48 fiber

## 6, 12 and 24 core power supply cable

### Features

- Highly flexible power cable with low bending radius
- White and red insulation according IEC 60445:2021
- 6, 12 and 24 core power supply cables with cross section up to 25 mm<sup>2</sup>
- Aluminum foil shielding and earth conductor for grounding
- CPR compliant class B2<sub>ca</sub>
- LSFH jacket material

## Specifications

Jacket material	Thermoplastic LSFH (low smoke free of halogen)
Insulation material	XLPE
Insulation color	Red and white, IEC 60445:2021
Screen	Aluminum foil with earth conductor copper tinned 6 mm <sup>2</sup>
UV-resistant	passed according to EN ISO 4892-2
CPR classification	class B2 <sub>ca</sub> -s1a,d1,a1
Standard	IEC 60502-1
Rated voltage	0.6 / 1.0 kV

# PTTA distribution box

## PTTA distribution box 6 RRH

### Features

- Ruggedised outdoor power distribution box
- Supports up to 6 remote radio heads
- Maximum current rating 40 A
- Push-in terminals with front connection to enable wiring in a confined space
- Suitable for mounting on poles, walls and tower legs with round, L, V and □-shape

The Power-to-the-Antenna distribution box 6 RRH is fitted with the latest connection technology – push in terminals - for conductors up to 16 mm<sup>2</sup> cross section. The push in terminals have front access to allow easy and fast connection. By using cable glands with 6-fold seals, the PTTA box has very small dimensions. The 6-fold seal is tailored to HUBER+SUHNER 2-core power jumper with 6 mm<sup>2</sup>, 10 mm<sup>2</sup> and 16 mm<sup>2</sup> conductors. With a maximum current of 40 A, the PTTA Box can be used for RRHs with high power consumption.

The opened lid is secured with a wire against falling down. The box is optional available with a hinged cover.

## Specifications

Number of RRH	up to 6
Dimension	278 x 188 x 130 mm
Power entry	Cable gland M50 with wrench size 60 mm, 2 seals for Ø 21.0 – 25.5 / Ø 25.5 – 36.0 mm 1 cable 12 core shielded up to 16 mm <sup>2</sup>
Power exit	Cable gland M63 with wrench size 73 mm, 3 seals for Ø 11.8 / 13.7 / 15.5 mm
Grounding cable	Ø 6.0 – 12 mm
Maximum voltage rating	- 74 Vdc
Maximum current rating per RRH	40 A (with 16 mm <sup>2</sup> 12 core power cable)
Terminals	Push-in type up to 16 mm <sup>2</sup>
Temperature range during installation	-10 to +40 °C
Temperature range during service	-40 to +75 °C
Box material	Polycarbonat, light grey (RAL 7035), halogen free
UV resistance	according UL 508
Ingress protection	IP 65 EN 60529
Impact resistance	IK 08 EN 62262

## Ordering information

Description	Item no.
PTTA distribution box 6 RRH for an installation with a 12 core power cable up to 16 mm <sup>2</sup> and 6 power jumper cable 6 to 16 mm <sup>2</sup> , push-in terminals, quick hose clamps for pole diameter 30 to 155 mm are included	85145915

## Customized PTTA (Power-To-The-Antenna) boxes

In addition to pure power distribution from multi-core copper cables to 2-core power jumper cables, HUBER+SUHNER offers customised configurations with circuit breakers and surge protection devices. The DC circuit breakers with hydraulic-magnetic technology have a rating capability that is independent of the ambient temperature, which is a great advantage when used on outdoor installations. The circuit breakers are available with 20A, 25A, 32A or 40A current rating. Surge protection device type 1/2 (class I/II) for grounded return installation are used for lightning protection or optional a lightning current arrester, in accordance with type 1 (class I) with impulse discharge current (10/350) µs 25 kA / 100 kA.

# PTTA distribution box

## PTTA distribution box 12 RRH

### Features

- Ruggedised outdoor power distribution box
- Supports up to 12 remote radio heads
- Maximum current rating 36 A
- Push-in terminals with front connection to enable wiring in a confined space
- Suitable for mounting on poles, walls and tower legs with round, L, V and □-shape

## Cable gland tools

### Features

hexagonal steel tube with a handle  
suitable for large cable glands with wrench size 60 to 85mm

To tighten the cable glands use the hexagonal tube with a handle. You will then torque to completion using the torque spanner to finish up the job for the best results. For the correct torque value please refer to the installation manual.

## Specifications

# MASTERLINE Ultimate Hybrid (MLUH)

## Hybrid-riser cable with compact connector head

The most innovative hybrid cabling system from HUBER+SUHNER for remote radio installation: MASTERLINE Ultimate Hybrid. The pre-connectorised factory-sealed hybrid systems supports up to 6 RRHs and connects the remote radios with easy-to-install Q-ODC fiber optic and power jumpers. A pre-laced hosting grip below the robust connector head allow for easy cable lifting. The encapsulated connector head can be directly attached to the mast at a pre-mounted bracket. These unique features make MASTERLINE Ultimate Hybrid the best-in-class product in terms of ease of mast-top installation, installation robustness and efficiency.

# MASTERLINE Ultimate Hybrid (MLUH)

# MASTERLINE Ultimate Hybrid (MLUH)

## Features

- Pre-connectorised factory-sealed hybrid cable system for 3 and 6 RRHs
- Modular „plug & play“ system compatible with Q-ODC/Q-ODC-12 and power jumpers
- Highly flexible 6-/12-core hybrid cable up to 16 mm<sup>2</sup>/AWG 6
- Encapsulated IP67 sealed connector head housing
- Hoisting grip for cable lifting
- Space-efficient, low wind-load
- Mounting bracket for easy mast-, pole-, and wall-installation
- Integral earth point which can be connected to an earth lead with M8 ring terminal
- Optional protection cover for cable exits available

## Specifications

	Small	Large

Hybrid cable with 6 pairs power wire and 6 pairs of fiber optic

Hybrid cables of HUBER+SUHNER combine optical fiber and DC power, are highly flexible and easy-to-route. Two rip cords between the shielding and the jacket allows a quick stripping of the jacket. The shielding, a copper foil under the jacket and the drain wire maintain contact throughout the cable run and allow potential equalisation and a safe installation with regard to lightning strikes.

# MASTERLINE Ultimate Hybrid (MLUH)

## Power connectors

Power connector plug at the jumper

Power connector flange socket at the MLUH connector head

### Features

- Rugged circular plastic plug connector for remote radio installations
- Machined crimp contacts  $\varnothing$  3.6 mm for high current
- Bayonet coupling system for easy and quick mating
- 2 wire shielded copper cable with cross section of 4 or 6 mm<sup>2</sup>

The bayonet coupling system enables a simple and fast mating. With only a 1/3 twist of the coupling ring, connectors are mated with an audible and tactile „click“. The machined 3.6 mm crimp contacts ensure a vibration safe termination and a high current rating. Specifications see page 41 (MLUP).

## Mating/un-mating sequences

Twist the coupling ring of the plug connector to remove protecting cap as shown.

Push plug connector slightly into flange connector, rotate to find keying position, twist coupling ring of the plug connector as shown.

Twist coupling ring as shown to un-mate the plug connector.

## Q-ODC connectors

Q-ODC plug on the jumper

Q-ODC socket on MLUH head

### Features

- Robust push-pull coupling mechanism – two clearly defined mating states
- Highest outdoor installation safety
- Waterproof, dust proof and corrosion resistant; does not require secondary wrapping

## Mating/un-mating sequences

Push plug connector slightly into socket connector, rotate to find keying position, push connector to mate.

Mated - connector snaps in and is fully strain relieved.

Pull coupling ring to un-mate.

# MLUH installation

Easiest-to-install hybrid product available on the market.

## Installation features

	<p><b>Installation video and manual</b>          With a smartphone the QR code attached to the spool can be scanned and it takes you directly to the relevant internet site where the installation manual or installation video can be chosen.</p>
	<p><b>MLUH mounting bracket</b>          The MLUH mounting bracket is fixed to the mast or wall before the MLUH is lifted.</p>
	<p><b>Unspooling</b>          The MLUH is supplied on a double-flange reel which allows for easy and straight-forward unspooling while lifting the cable up the mast.</p>
	<p><b>Pulling</b>          With a pre-laced hosting grip below the MLUH connector head, the cable system is lifted up to the mast.</p>
	<p><b>Hook-in MLUH head at mounting bracket</b>          After the protection air bubble bag is removed, the MLUH connector head can be hooked-in to the mounting bracket.</p>
	<p><b>RRH connection</b>          The remote radios are connected with fiber optic jumpers, which are terminated with Q-ODC/ Q-ODC-12 plug connectors and RRH compatible interfaces. The power jumpers are terminated with a rugged circular plastic plug connector and are blunt cut on the RRH side.</p>
	<p><b>Earthing</b>          The MLUH head has an integral earth point which can be connected to an earth lead with M8 ring terminal. Optional, the shielding of the hybrid cable can be grounded with standard grounding kits.</p>
	<p><b>Base station connection</b>          The pre-terminated LC fiber optic connectors are protected with a IP65 protection tube. Once the protection tube is screwed-off, the installer has access to the fiber optic breakout cables and the individual copper/ground wires.</p>
	<p><b>Overlength management</b>          The hybrid cable has 2 rip cords below the jacket to allow easy stripping of the jacket over a distance of several meters. This allows the installer to cut the excess length of the copper wire while the overlength of the pre-terminated fiber cable is stored inside the base station or in a overlength box.</p>

# MASTERLINE Ultimate Hybrid (MLUH) with Q-ODC-2

## Q-ODC RRH jumpers

### Features

- Compatible with MLE, MLEH, MLU and MLUH terminated with Q-ODC
- Ruggedised and robust RRH jumper cable – easy and reliable to install
- Available for all types of RRH
- Cable diameter 4.8 mm, 5.5 mm or 7 mm
- Standard lengths of 2, 5 and 10 m, customised lengths available

Jumpers for all types of remote radio systems available.  
Ordering information see page 30 (MLU).

## Power jumpers

### Features

- Compatible with MLUP, MLEP, MLEH and MLUH
- Terminated with a rugged circular plastic plug connector and blunt cut on the RRH side
- 2 wire shielded copper cable with a cross section of 4 mm<sup>2</sup> to 10 mm<sup>2</sup> and AWG 12 to AWG 8
- Standard length 2, 5 and 10 m

Ordering information see page 43 (MLUP).

MASTERLINE Ultimate Hybrid (MLUH) is the most innovative hybrid cabling system of HUBER+SUHNER for remote radio installation.

The pre-connectorised factory-sealed hybrid systems supports up to 6 RRHs and connects the remote radios with easy-to-install Q-ODC fiber optic and power jumpers. A pre-laced hoisting grip below the robust connector head allow for easy cable lifting. The encapsulated connector head can be directly hooked in to a pre-mounted bracket.

The MLUH head has an integral earth point which can be connected to an earth lead with M8 ring terminal. Optional, the shielding of the hybrid cable can be grounded with standard grounding kits.

The hybrid cable is designed in a way that the outer jacket and shielding can be easily stripped off over a distance of several meters. This allows the installer to cut the excess length of the copper wire while the over-length of the pre-terminated fiber cable is stored inside the base station or in an overlength box.

These unique features make MASTERLINE Ultimate Hybrid the best-in-class product in terms of ease of mast-top installation, installation robustness and efficiency.

# MASTERLINE Ultimate Hybrid (MLUH) with Q-ODC-12

## Features

- Pre-connectorised factory-sealed hybrid cable system with 3 power connectors and 3 Q-ODC-12 connectors
- Modular „plug & play“ system compatible with Q-ODC-12 jumpers
- Encapsulated IP67 sealed connector head housing
- Hoisting grip for cable lifting
- Space-efficient, low wind-load
- Mounting bracket for easy mast-, pole- and wall-installation
- Integral earth point which can be connected to an earth lead with M8 ring terminal
- Optional protection cover for cable exits available

## Specifications

Number of rugged circular power sockets		3
Number of Q-ODC-12 sockets		3 (12 fibers per socket)
Dimensions L x W x H		310 x 90 x 97 mm
Rated current		up to 42 A per power socket
Ambient temperature range	in service	-40 to +75 °C
	installation	-10 to +50 °C
Ingress protection (IEC 60529)		IP67
Impact resistance (IEC 62262) IK 10		IK 10
Material housing		high-performance polycarbonate
UV resistant for outdoor use		EN ISO 4892-3:2016
Material flammability rating		UL94-V0

MASTERLINE Ultimate Hybrid with Q-ODC-12 allows the connection to 18 remote radio interfaces and 3 power supply units.

The MLUH connector head is equipped with 3 power connectors and 3 Q-ODC-12 sockets.

# MASTERLINE Ultimate Hybrid (MLUH) with Q-ODC-12

## Q-ODC-12 connector

Q-ODC-12 plug on the multi-branch RRH jumper

Q-ODC-12 socket on MLUH head

### Features

- Connects 12 fibers in one mating step
- Compact design with MT ferrules
- Robust push-pull coupling mechanism – two clearly defined mating states
- Highest outdoor installation safety
- Waterproof, dust proof and corrosion resistant

Specifications on page 145.

## Mating/unmating sequences

Push plug connector slightly into extension connector, rotate to find keying position, push connector to mate.

Mated – connector snaps in and is fully strain relieved.

Pull coupling ring to unmate.

# MASTERLINE Ultimate Hybrid High Voltage (MLUH HV)

## Hybrid-riser cable with compact connector head high voltage CE conformity

The most innovative hybrid cabling system of HUBER+SUHNER for remote radio installation became even more innovative by offering capability to deliver 230 VAC up the mast, allowing much longer cabling with significant cost savings on cables and more efficient power transfer. The pre-connectorised factory-sealed hybrid systems supports up to 12 RRHs and connects the remote radios with easy-to-install Q-ODC fiber optic and power jumpers. The encapsulated connector head can be directly attached to the mast with a single „click“ at a pre-mounted adaptor plate. These unique features make MASTERLINE Ultimate Hybrid High Voltage the only in-class product offering all the advantages of the MASTERLINE Ultimate family together with high voltage conformity confirmed by the worldwide recognised CE marking. For extra safety the whole head is protected by removable cover.

# MASTERLINE Ultimate Hybrid High Voltage (MLUH HV)

Hybrid cables of HUBER+SUHNER combine optical fiber and AC power, are highly flexible, easy-to-route and offer substantial costs savings due to lower number of copper conductors. The rip cord between the shielding and the jacket allows a quick stripping of the jacket. The power cable consist of three conductors extra shielded by the braided copper shield.

Hybrid cable consisting of a shielded power cable with 3 conductors (L, N, PE) and a fiber optic cable with 24 fibers

## Specifications

Jacket material		thermoplastic, low smoke, free of halogen
Standard		IEC 60502-1:2004-04
Temperature range	in service	-40 to +75 °C
	installation	-10 to +50 °C
Operating voltage		230 VAC
Rated voltage		0.6 kV/1 kV (1.2 kV)
Min. bending radius	during installation	10 × cable-Ø
	in service	8 × cable-Ø
Conductors		4 mm <sup>2</sup>
Fiber optic		non-armoured multifiber loose tube jelly-filled
Halogen-free		yes
Flame retardant		IEC 60332-1-2:2004.
UV resistant		IEC 60068-2-5
CE conform		yes
CPR compliant		yes, class D <sub>ca</sub>

Ask your local sales contact for further information or find more information at <http://literature.hubersuhner.com/Technologies/Fiberoptics/LowInductanceWhitepaper/>.

# MASTERLINE Ultimate Hybrid High Voltage (MLUH HV)

## Power connectors

Power connector plug at the jumper

Power connector flange socket at the MLUH connector head

### Features

- Rugged circular plastic plug connector for remote radio installations
- Machined crimp contacts  $\varnothing$  3.6 mm for high current
- Bayonet coupling system for easy and quick mating
- 3 wire shielded copper cable with 1.5 mm<sup>2</sup> cross section

The bayonet coupling system enables a simple and fast mating. With only a 1/3 twist of the coupling ring, connectors are mated with an audible and tactile „click“. The machined 3.6 mm crimp contacts ensure a vibration safe termination and a high current rating. Specifications see page 41 (MLUP).

### Mating/unmating sequences

Twist the coupling ring of the plug connector to remove protecting cap as shown.

Align white strip on the plug with the white strip on the socket to find keying position easier. Make sure the plug connector is in-line with the socket connector before coupling ring is twisted.

Twist coupling ring as shown to mate or unmate the plug connector.

## Q-ODC connectors

Q-ODC plug on the jumper

Q-ODC socket on MLUH HV

### Features

- Robust push-pull coupling mechanism – two clearly defined mating states
- Highest outdoor installation safety
- Waterproof, dust proof and corrosion resistant; does not require secondary wrapping

Specification see page 145 (Fiber optic interfaces).

### Mating/unmating sequences

Push plug connector slightly into socket connector, rotate to find keying position, push connector to mate.

Mated - connector snaps in and is fully strain relieved.

Pull coupling ring to unmate.

# MLUH HV installation

Easiest-to-install hybrid product available on the market.

## Installation features

	<p><b>Installation video and manual</b>          With a smartphone the QR code attached to the spool can be scanned and it takes you directly to the relevant internet site where the installation manual or installation video can be chosen.</p>
	<p><b>MLUH HV mounting bracket</b>          The MLUH HV mounting bracket is fixed to the mast or wall before the MLUH HV is lifted.</p>
	<p><b>Unspooling</b>          The MLUH HV is supplied on a double-flange reel which allows for easy and straight-forward unspooling while lifting the cable up the mast.</p>
	<p><b>Pulling</b>          With a pre-laced hosting grip below the MLUH connector head, the cable system is lifted up to the mast.</p>
	<p><b>Hook-in MLUH HV head at mounting bracket</b>          After the protection air bubble bag is removed, the MLUH HV connector head can be hooked-in to the mounting bracket.</p>
	<p><b>RRH connection</b>          The remote radios are connected with fiber optic jumpers, which are terminated with Q-ODC/ Q-ODC-12 plug connectors and RRH compatible interfaces. The power jumpers are terminated with a rugged circular plastic plug connector and are blunt cut on the RRH side.</p>
	<p><b>Earthing</b>          The MLUH HV head has an integral earth point which can be connected to an earth lead with M8 ring terminal. Optional, the shielding of the hybrid cable can be grounded with standard grounding kits.</p>
	<p><b>Base station connection</b>          The pre-terminated LC fiber optic connectors are protected with a IP65 protection tube. Once the protection tube is screwed-off, the installer has access to the fiber optic breakout cables and the individual copper/ground wires.</p>
	<p><b>Overlength management</b>          The hybrid cable has 1 rip cord below the jacket to allow easy stripping of the jacket over a distance of several meters. This allows the installer to cut the excess length of the copper wire while the overlength of the pre-terminated fiber cable is stored inside the base station or in a overlength box.</p>

# MASTERLINE Extreme Hybrid (MLEH)

## Hybrid-riser cable with compact divider

The hybrid cabling system of HUBER+SUHNER is the most efficient and easiest to install product available on the market. Mobile operators on four continents verified that MASTERLINE Extreme Hybrid can be installed in half of the time of competitive hybrid solutions based on corrugated coax cable designs. The factory-terminated „plug & play“ system in combination with a highly flexible and easy-to-route cable makes the HUBER+SUHNER solution the hybrid cable of choice for operators, system vendors and installers alike.

The pre-terminated hybrid cable assembly minimises the quantity of cables running up the mast. The compact divider splits the optical fiber and DC power cable into individual ruggedised outdoor cables which are linked to the RRHs – either directly or via extension jumpers without the need for bulky mast mount distribution boxes. The RRH jumpers allow an adaptation to different RRH interfaces and therefore make the solution independent from the system vendor's hardware.

# MASTERLINE Extreme Hybrid (MLEH)

# MASTERLINE Extreme Hybrid (MLEH)

## Features

- Hybrid cabling system for up to 9 RRHs
- Highly flexible hybrid cable with low bending radius and excellent cable routing properties
- Overlength management – cable jacket with ripcords for easy and quick stripping
- Ruggedised powder coated aluminum with robust breakout cables
- Mounting bracket for easy mast-, pole- and wall-installtion
- Hoisting grip for cable lifting
- Supplied on double-flange reels for straight forward unspooling
- Fiber optic breakout cables terminated with Q-ODC extensions to connect with Q-ODC RRH jumpers
- Power cable connectorised or blunt cut
- Integral earth point which can be connected to an earth lead with M8 ring terminal

\* limitation through power connector maximum current rating 42 A (IEC) and 44 A (UL)

# MASTERLINE Extreme Hybrid (MLEH)

Easiest-to-install hybrid product available on the market.

The easy way to your installation instructions „Please consider the environment before printing“. With this well-known statement in mind we have decided to stop printing installation manuals. As of today the hybrid cable system spools from HUBER+SUHNER fiber optics will feature a QR code. Whilst on site, scanning it with your smartphone or tablet takes you directly to the relevant online installation instructions. Just scan the QR code and choose installation manual or video to get exclusive installation support by HUBER+SUHNER. This approach works with any available QR code scanner for mobile devices.

## Installation features

	<p><b>Unspooling</b> The MLEH is supplied on a double-flange reel which allows for easy and straight-forward unspooling while lifting the cable up the mast.</p>
	<p><b>Lifting</b> The radio end is equipped with a robust braided sleeve with pulling eye which protects and keeps the break-out cables in vertical position during installation. With the hoisting grip, attached below the divider, the cable system is lifted up to the mast.</p>
	<p><b>Fixation</b> The MLEH mounting bracket has a snap-in mechanism for quick and easy fixation of the divider housing. The clips can be closed by hand without any tool.</p>
	<p><b>Earthing</b> The MLEH enclosure has an integral earth point which can be connected to an earth lead with M8 ring terminal. Optional, the shielding of the hybrid cable can be grounded with standard grounding kits.</p>
	<p><b>Base station connection</b> The pre-terminated LC fiber optic connectors are protected with a IP65 protection tube. Once the protection tube is screwed-off, the installer has access to the fiber optic break-out cables and the individual copper/ground wires.</p>
	<p><b>Overlength management</b> The hybrid cable is designed in a way that the outer jacket and shielding can be easily stripped off with a ripcord over a distance of several meters. This allows the installer to cut the excess length of the copper wire while the overlength of the pre-terminated fiber cable is stored inside the base station or in an overlength box.</p>

# MASTERLINE Extreme Hybrid (MLEH)

## Available configurations

Configuration	Pairs of power wires	Pairs of fiber optic	Market	Wire cross section	Power breakout	Fiber optic breakout

## Q-ODC-2 connectors

Q-ODC plug on the jumper

Q-ODC extension on the MLEH

MASTERLINE Extreme Hybrid allow for quick and reliable connections of fiber optic jumpers. The fiber optic connector Q-ODC has a robust push-pull coupling mechanism with two clearly defined mating states for highest outdoor installation safety.

Specification see page 145 (fiber optic interfaces).

## Power connectors

Power connector plug at the jumper

Power connector extension at the MLEH (0.5 m long breakout)

The power breakout cables are either direct connected to the screw terminals of the RRHs or via power jumper, which are terminated with a rugged circular connector. The power connectors have a bayonet coupling system which enables a simple and fast mating. With only a 1/3 twist of the coupling ring, connectors are mated with an audible and sensitive „click“. The machined 3.6 mm crimp contact ensure a vibration safe termination and a high current rating.

Specification see page 41 (MLUP).

## Hybrid cable

Hybrid cable with 6 pairs power wire and 6 pairs of fiber optic

Hybrid cables of HUBER+SUHNER combine optical fiber and DC power, are highly flexible and easy-to-route. Two rip cords between the shielding and the jacket allows a quick stripping of the jacket. The shielding, a copper foil under the jacket and the drain wire maintain contact throughout the cable run and allow potential equalisation and a safe installation with regard to lightning strikes.

## MASTERLINE Extreme Hybrid is currently deployed nationwide in US

Two US operators (T-Mobile and Sprint) have selected MLEH for their nationwide network rollout. No other hybrid cabling system can be installed faster and more efficiently. The „plug & play“ solution has excellent installation features like robust pulling tubes or a field-manageable method to strip and cut the excess power cable at the base station. These unique features convince operators and installers at the same time – there no other hybrid solution which comes close.

## Customer voices – best system to install

Installers are impressed by how easy and fast the MASTERLINE Extreme Hybrid can be installed. An experienced rigger in UK brought it to the point: „This is the best system to install“. The HUBER+SUHNER hybrid cable is flexible, easy to pull up the mast and to route inside of conduits or monopoles. Competitive solutions suffer from stiff corrugated cables designs and a Latin American operator wrote in an installation report „difficult to install due to cable’s inflexibility, handling problems to install the cable up the mast, long time to install the boxes on the top“.

The HUBER+SUHNER MLEH is a boxless solution, all connectors have quick-lock mechanisms and overlength management is efficiently solved.

## Q-ODC RRH jumpers

### Features

- Compatible with MLE, MLEH, MLU and MLUH terminated with Q-ODC
- Ruggedised and robust RRH jumper cable – easy and reliable to install
- Available for all types of RRH
- Cable diameter 4.8 mm, 5.5 mm or 7 mm
- Standard lengths of 2, 5 and 10 m, customised lengths available

Jumpers for all types of remote radio systems available. Ordering information see page 30 (MLU).

## Power jumpers

### Features

- Compatible with MLEP, MLEH and MLUH
- Terminated with a rugged circular plastic plug connector and blunt cut on the RRH side
- 2 wire shielded copper cable with a cross section of 4 or 6 mm<sup>2</sup>/AWG 10
- Standard length 2, 5 and 10 m

Ordering information see page 43 (MLUP).

## Global supply chain for hybrid assemblies

HUBER+SUHNER operates hybrid assembly shops in Poland, Mexico, China and has plans to expand the manufacturing network to other regions as well. Being close to our customers is a must for bulky hybrid assemblies with weights exceeding 100 kg.

Our operations network enables HUBER+SUHNER to respond immediately to our customers' needs and to provide a fast and flexible delivery performance.

# MASTERLINE Extreme Hybrid (MLEH)

## Power connectors

Power connector plug at the jumper

Power connector extension at the MLEH (0.5 m long breakout)

### Features

Rugged circular plastic plug connector for remote radio installations  
 Machined crimp contacts  $\varnothing$  3.6 mm for high current  
 Bayonet coupling system for easy and quick mating  
 2 wire shielded copper cable with cross section of 4 or 6 mm<sup>2</sup>/AWG 10

MASTERLINE Extreme Hybrid is optional available with a rugged circular plastic power connector. The bayonet coupling system enables a simple and fast mating. With only a 1/3 twist of the coupling ring, connectors are mated with an audible and tactile „click“. The machined 3.6 mm crimp contacts ensure a vibration safe termination and a high current rating.

## Mating/unmating sequences

Twist the coupling ring of the power jumper plug connector to remove protecting cap as shown.

Twist the coupling ring of the MLEH receptacle connector to remove protecting cap as shown.

Push plug connector slightly into receptacle connector, rotate to find keying position.

Twist coupling ring of the power jumper plug connector to mate the connectors as shown.

# MASTERLINE Classic Hybrid (MLCH)

## Hybrid-riser cable with distribution box

This solution, a factory-terminated hybrid-riser cable assembly, minimises the amount of cables running up the mast. At the hybrid distribution box the multifiber/wire cable are split into individual cables which are linked to the RRHs with short jumper cables. The jumpers allow an adaptation to different RRH interfaces and therefore make the solution independent from the system vendor's hardware. A box solution enables the use of circuit breaker and/or surge protection devices.

However, this installation method requires large and bulky boxes on the top of the mast. With increasing number of remote ratios per site, space limitations and wind load become critical issues. Many operators also want to avoid the risk of opening and maintaining mast-top boxes by non-trained or non-authorized persons.

# MASTERLINE Classic Hybrid (MLCH)

# MASTERLINE Classic Hybrid (MLCH)

## Distribution box

### Features

- Ruggedised outdoor distribution box for fiber optic and power supply
- Supports up to 6 remote radio heads
- Fitted with bend radius limiting mandrels
- Power distribution up to 15 A per remote radio head
- Optional with circuit breaker or/and surge protection devices
- Cover stores up to 20 m fiber optic cables excess length
- Suitable for mounting on poles, walls and tower legs
- Easy to mount and install with pre-mounted brackets
- Hybrid cable clamp integrated on mounting brackets
- Protective vent to equalise pressure and prevent condensation

## Specifications

Number of RRH		up to 6 RRH
Compatible with MASTERLINE Classic Hybrid		up to 12 fibers and up to 12 power wire
Box dimensions		429 × 390 × 159 mm
U <sub>N</sub> rated voltage		-48 V DC
I <sub>N</sub> rated current per RRH	without circuit breaker	15.0 A
	with circuit breaker	11.7 A
Ambient temperature range	operation	-40 to +75 °C (with CB +55 °C)
	installation	-10 to +50 °C
Box material		glass-filled polycarbonate
Ingress protection		IP67
Impact resistance		IK 07 (EN 62262)
Colour		RAL 7035 grey
Halogen-free		IEC 60754-2
UV resistant for outdoor use		ISO 4892-3
Material flammability rating		UL94-V0
Screw terminals	cable entry	6 mm <sup>2</sup> to 16 mm <sup>2</sup> (25 mm <sup>2</sup> without wire end sleeves)
	cable exit	4 mm <sup>2</sup> to 6 mm <sup>2</sup>
Circuit breaker (optional)		miniature circuit breaker C 20 A
Surge protection device (optional)		SPD type 1+2/class I+II or type 2/class II

# MASTERLINE Classic Hybrid (MLCH)

## Distribution box – installation features

	<p><b>Pre-installed power distribution and fiber management components</b>          Pre-installed screw terminals and optional circuit breaker and/or surge protection device for up to 6 RRHs. Bend radius limiting mandrels and an LC duplex adaptor plate ensure safe fiber management. Glands for power and fiber optic jumper cable are pre-mounted.</p>
	<p><b>Pulling</b>          The HTTA box has a robust mounting bracket with which the box and hybrid cable can be lifted up the mast.</p>
	<p><b>Overlength management in cover</b>          Up to 20 m of jumper or multi-riser cable can be stored in the cover. The cable is routed and retained to allow for easy opening/closing of the cover without affecting the cable excess length.</p>
	<p><b>Cable entry</b>          A knock-out holes with <math>\varnothing</math> 40.0 mm in the middle of the bottom allows to enter the MLCH with its pre-mounted M40 cable gland.          1 x M40 cable gland for MLCH <math>\varnothing</math> 18.0 to 32.0 mm          As an option , the HTTA box can be used for an installation with 1 or 2 power main cables and a separate multifiber riser cable (MLC) instead of a hybrid cable.          1 x M40 cable gland for power main cable <math>\varnothing</math> 16.0 to 28.0 mm          1 x M32 cable gland for an optional 2nd power main cable <math>\varnothing</math> 18.0 to 25.0 mm          1 x hole 16 mm for MLC 12 fibers and 1 x hole 26 mm for MLC 24 fibers</p>
	<p><b>Cable exits</b>          The standard configuration is designed for 6 fiber optic and power jumper cables with the option to increase the number of fiber optic jumpers up to 12. The HTTA box can be electrically grounded with a 16 mm<sup>2</sup> earthing cable through a M20 cable gland.          1 x M32 cable gland with 6-fold seal for 6 jumper cable <math>\varnothing</math> 4.8 to 7.0 mm          6 x M25 cable glands for 6 power main cable <math>\varnothing</math> 9.0 to 16.0 mm          1 x M20 cable gland for earthing cable <math>\varnothing</math> 6.0 to 12.0 mm</p>

Options:

12 LC duplex adapter

Multimode adapter

Customised DIN-Rail (screw terminal, circuit breaker, surge protection device)

The hybrid box is designed for flexible configurations (e.g. with surge protection devices), ease and quick deployment of up to 6 remote radio heads. Its innovative design allows for installation using MASTERLINE Classic Hybrid (MLCH), a factory-terminated hybrid cable assembly or MASTERLINE Classic (MLC) bundled fiber and bundled power riser cables.

All power distribution and fiber management components are pre-installed and the robust mounting bracket allows the hybrid cable to be pulled up with the box.

The HTTA box also has the capability to store up to 20 m of fiber cabling (riser or jumper) in its cover and has the option to have connectorised outputs for the ultimate in flexibility..

Hybrid cable with 6 pairs power wire and 6 pairs of fiber optic

Hybrid cables of HUBER+SUHNER combine optical fiber and DC power, are highly flexible and easy-to-route. Two rip cords between the shielding and the jacket allows a quick stripping of the jacket. The shielding, a copper foil under the jacket and the drain wire maintain contact throughout the cable run and allow potential equalisation and a safe installation with regard to lightning strikes.

## LC duplex RRH jumpers

### Features

- Jumper available for all types of remote radios
- Cable diameter 4.8 mm, 5.5 mm or 7 mm
- Standard lengths of 2 m and 5 m, any customised length available

The HTTA box enables the use of 6 RRH jumper cables (optional 12) through 2 cable glands with pre-split sealings. Ordering information see page 64 (MLC).

## 2-core power jumpers

### Features

- 2 core copper cable for RRH power supply
- LSFH™ jacket material
- Braided copper shield
- 6 and 10 mm<sup>2</sup> cross section

# Accessories for remote radio installation solutions

HUBER+SUHNER is an experienced partner for remote radio installation and we are close to the installers working in the field. We understand the daily installation issues and the need for field-proven tools and accessories.

Excess cable boxes help to safely store fiber optic cable at the bottom of the mast or in 19" racks. The 19" CTB patching box with a pullout tray for easy access fits to the MASTERLINE cable system.

19" power distribution units for up to 6 radio heads - each electrical circuit is fused with a circuit breaker - are compatible with MASTERLINE hybrid cabling systems of HUBER+SUHNER.

Further, we offer a basic cable clamp portfolio, which covers most of the RRH installation solutions and cable combinations. The used clamps are field-proven, easy to install and allow for an upgrade or exchange of cables.

We offer a universal grounding kit specially designed to accommodate the range of HUBER+SUHNER power and hybrid cable sizes. Also available is a heavy-duty cable stripping tool.

# Accessories

## Distribution box

### Features

- Outdoor and indoor installation
- Store up to 30 m cable excess length (depending on cable diameter)
- Easily mountable on poles, on walls or in 19" racks (1U)
- Supplied with fixing brackets, screws, a laser warning label and some hook and loop cable ties

## Specifications

Dimensions without mounting bracket	477 × 280 × 43.8 mm (1 unit)

## Grounding kit for hybrid cables

### Features

- Universal grounding kit for hybrid cables
- Cable diameter range 16 mm to 40 mm
- 0.5 m long grounding wire 16 mm<sup>2</sup>
- Tin plated copper lug for M8 screw

The universal grounding kit is specially designed to accommodate the range of HUBER+SUHNER hybrid cable sizes. The tinned copper strap and associated hardware facilitates a proper attachment to the braided screen or copper foil. The 16 mm<sup>2</sup> (AWG 6), stranded copper wire with a one-hole lug (Ø 8.5 mm) provides a low inductance transfer of lightning induced current from the hybrid cable to the system ground. Installation of grounding kits is recommended at the top and bottom of each vertical run, at 20 m (66 ft) increments and just prior to building entry.

## Specifications

Typical contact transition resistance	1 mΩ
Current handling capability (10/350 μs)	25 kA
Ingress protection	IP67
Ambient temperature range	-40 to 75 °C

## Installation features

<p>List of components</p> <ul style="list-style-type: none"> <li>Tinned copper strap assembly with 0.5 m grounding wire and one-hole lug (Ø 8.5 mm)</li> <li>50.8 mm × 6.1 m (2" × 20") roll electrical tape (PVC)</li> <li>63.5 mm × 0.4 m (2-1/2" × 15") roll butyl mastic</li> <li>Coiling tool</li> <li>Installation manual</li> </ul>	
<p>The ground strap is wrapped around the exposed screen. The end of the strap has to be pulled through the slot at the strap. With the attached coiling tool the strap has to be tightened. There is an expansion joint at the strap which provides a visual indication if the strap is tightened enough. Note: H+S recommend to use the adjustable heavy-duty cable stripping tool with H+S item no. 85029959.</p>	
<p>Butyl mastic is placed around the clamp and acts as a filler. The vinyl electrical tape is wrapped around the hole ground strap to make it waterproof.</p>

## Grounding cable

### Features

- Flexible single core grounding cable
- RADOX 125 jacket material with excellent outdoor characteristics
- Stranded tin plated copper conductor
- M8 lugs on both ends
- Available in both black or yellow/green colours

HUBER+SUHNER grounding cables with RADOX 125 (electron beam crosslinked polyolefin copolymer) jacket and M8 lugs on both ends fits onto the integral earth stud of MLEP, MLEH, MLUP and MLUH cabling systems.

## Specifications

Conductor	stranded tin plated copper, class 5 acc. to EN 60228
Jacket material	electron beam crosslinked polyolefin copolymer
Ambient temperature range	-40 to 75°C
Rated Voltage U0/U	600 V/1000 Vac
Test voltage	3500 Vac
Halogen-free	acc. EN 50363
Lug type	tubular standard cable lug
Size of bolt diameter	M8
Lug material	tin-plated copper acc. to EN 13600

## Heavy-duty cable stripping tool for power and hybrid cable

Adjustable heavy-duty cable stripping tool Wire size: 4.5 to 40 mm/0.18" to 1.57" Stripping dimensions adjustable up to 4.5 mm/0.18" insulation thickness	85029959	
Spare blade for adjustable heavy-duty cable stripping tool (85029959)	85032058	

## MLEP/MLEH mounting bracket

mounting bracket  
MLEH small

mounting bracket  
MLEH large

### Features

- Quick and easy to install
- Robust stainless steel bracket
- UV resistant plastic clip with snap-in mechanism
- Clip can be closed without tool
- Suitable for poles and walls

The MLEP/MLEH mounting bracket has a snap-in mechanism for quick and easy fixation of the divider housing. The clips are UV resistant can be closed by hand without any tool. With a medium size screw drive the clip can be reopened at any time.

## Specifications

Bracket material	stainless steel	
Plastic clip	PA12 black	
Dimension W x H x D	mounting bracket MLEH small	159 mm x 122 mm x 89 mm
	mounting bracket MLEH large	159 mm x 164 mm x 89 mm

## Ordering information

Description	Item no.	
Mounting bracket with 2 clips for MLEP/MLEH small	85140742	
Mounting bracket with 1 double clip for MLEP/MLEH large	85140743	

## Quick hose clamp

### Features

- Stainless steel
- Diameter 40 to 160 mm or 60 to 500 m

## Specifications

Material	stainless steel 304	
Material thickness	0.65 mm	
Dimension width	14.2 mm	
Dimension range	30 to 155 mm/60 to 500 mm	

## Ordering information

Quick hose clamp One set including 2 pieces	diameter range 30 to 155 mm	84076411
	diameter range 60 to 500 mm	84076412

# Fiber optic interfaces for remote radio heads

HUBER+SUHNER is the leading supplier of harsh environment fiber optic interfaces for remote radio heads. RRH are installed in many different types of environments such as coastal areas, urban buildings or rural tower sites and extreme temperatures, vibration, salt mist, corrosive gases and humidity are all typical challenges. Therefore robustness and reliability are crucial for the design of RRH interfaces. Additionally, the interface needs to be safe to install and must not cause any installation errors – this is essential to compensate for unskilled installers.

Damage to fiber optic interfaces is the number one cause of defects during RRH installation. Innovation and field-experience enables HUBER+SUHNER to design leading RRH interfaces like ODC and Q-ODC.

# Q-ODC-2 Mini – smallest fiber optic connector for harsh environments

Fiber optic products manufactured by HUBER+SUHNER are suitable for complex applications with very high data rates and are constantly being further developed. HUBER+SUHNER is now expanding the connector portfolio with the Q-ODC-2 Mini. The size optimised connector with two fibers is used in especially harsh environmental conditions. Even when installation has to be fast and safe, this smallest fiber optic interface is the ideal solution for applications in communication and industrial market.

# Fiber optic interfaces for remote radio heads

## Harsh environment connectors Q-ODC-2 Mini

### Features

- 2 fibers, singlemode or multimode
- Compact design with 2 x 1.25 mm ferrules
- Size optimised built-in socket
- Extension connector for cable chaining
- Robust push-pull coupling mechanism – two clearly defined mating states
- Highest outdoor installation safety
- Waterproof, dust proof and corrosion resistant
- Waterproof protection caps available
- EMI protected
- RoHs compliant

## Specifications

Characteristics	Tested acc. to	Values
Technology		full ceramic ferrule and sleeve
Housing material		nickel-plated brass
Mating mechanism		push-pull with two clearly defined states
Mechanical performance	Q-ODC plug	≤ 150 N tensile load
Operating temperature <sup>1)</sup>	IEC 61300-2-22	-40 up to +85 °C
Mating durability	IEC 61300-2-2	50 cycles <sup>2)</sup>
Ingress protection (mated)	IEC 60529	IP68
Salt mist	IEC 61300-2-26	30 days passed
Vibration	IEC 61373	passed category 1A/B, 2, 3
Shock	IEC 61373	passed category 1, 2

<sup>1)</sup> depending on cable type, <sup>2)</sup> with repeated cleaning

## Optical performance

Characteristics	Conditions	Tested acc. to	Values
Insertion loss/IEC 61300-3-34	single-mode	typ. ≤ 0.20 dB	97 % ≤ 0.45 dB
	multimode	typ. ≤ 0.20 dB	97 % ≤ 0.50 dB
Return loss		≥ 50 dB

## Harsh environment connectors Q-ODC-2 plug/socket

### Overview of Q-ODC-2 connector types

Type new	Connector	Dust cap		
QOP5		push-on	IP67	
QOP6		push-on	IP67	
QOE5		push-on	IP67	
QOE6		push-on	IP67	
QOS1		push-on	IP67	
QOS2		push-on	IP67	
QOS3		snap-on	IP67	
QOS4		snap-on with chain	IP67	
QOR1		push-on	IP67	
QOR2		push-on	IP67	
QOR3		snap-on	IP67	
QOR4		snap-on with chain	IP67	

### Q-ODC – push-pull connector for modular cell site installations

Q-ODC is used by a growing number of operators who build a modular and flexible cell site cable infrastructure. The push-pull connectors allows for quick and reliable cable connections, e.g. for top-mast boxes or jumpers. Additionally, the interface is designed that it is either mated or unmated – nothing in between. This makes each installation of cell site infrastructure safe.

# Fiber optic interfaces for remote radio heads

## Q-ODC-12 / Q-ODC-24 outdoor connector

### Features

- Up to 24 fibers, singlemode or multimode
- Compact design with MTP ferrules
- Built-in socket with square flange/hexagonal flange
- Extension connector for cable chaining
- Robust push-pull coupling mechanism- two clearly defined mating states
- Highest outdoor installation safety
- Waterproof, dust proof and corrosion resistant
- Waterproof protection caps available
- RoHs compliant

### Specifications

Technology		plastic ferrule (PPS)
Housing material		nickel-plated brass
Mating mechanism		push-pull with two clearly defined states
Mechanical performance	Q-ODC plug	≤ 500 N tensile load    ≤ 30 N static side load
	Q-ODC socket	≤ 30 N tensile load
Operating temperature <sup>1)</sup>	IEC 61300-2-22	-40 up to +85 °C
Mating durability	IEC 61300-2-2	100 cycles <sup>2)</sup>
Ingress protection (mated)	IEC 60529	IP68 (3 m/30 days)
Salt mist	IEC 61300-2-26	30 days passed
Vibration	IEC 61300-2-1	passed 10 to 500 Hz/10 g
Shock	IEC 61300-2-9	passed 100 g
	IEC 61373	passed category 1, 2

<sup>1)</sup> depending on cable type, <sup>2)</sup> with repeated cleaning

### Optical performance – MTP performance by fiber type/grade

Fiber type/grade	Typical IL (dB)	Maximum IL (dB)	RL
Low-loss single-mode (SM MT Elite)	0.15	0.35	≥ 60 dB
Low-loss multimode (MM MT Elite)	0.15	0.35	

### Mating/unmating sequences

Push plug connector slightly into extension connector, rotate to find keying position, push connector to mate. Use arrows on a boot for pre-alignment.

Mated – connector snaps in and is fully strain relieved.

Pull coupling ring to unmate.

## ODC<sup>®</sup>-2 outdoor connector

### Features

- 2 fibers, singlemode or multimode
- Compact design with 2 x 1.25 mm ferrules
- Built-in socket with square or hexagonal flange
- Extension connector for cable chaining
- Screwed locking mechanism
- Easy and safe installation
- Waterproof, dust proof and corrosion resistant
- Waterproof protection caps
- EMI protected
- RoHs compliant
- Full compatibility with previous version

## Specifications

Technology		full ceramic ferrule and sleeve
Housing material		nickel-plated brass
Mating mechanism		push-pull with two clearly defined states

# Fiber optic interfaces for remote radio heads

## ODC<sup>®</sup>-2 outdoor connector

### Overview of ODC-2 connector types

Type	Type new	Connector	Dust cap
A1	ODP5	ODC-2 plug 	screwed cap with pulling feature IP68 
A4	ODP6		screwed cap with chain IP68 
E1	ODE5	ODC-2 extension (socket type) 	screwed cap IP68 
E3	ODE6		screwed cap with chain IP68 
C1	ODS5	ODC-2 socket, square small 	screwed cap IP68 
C3	ODS6		screwed cap with chain IP68 
B3	ODR1	ODC-2 socket, hexagonal, mounted from rear 	screwed cap IP68 
B4	ODR2		screwed cap with chain IP68 

### ODC – worldwide the most often installed remote radio interface

We believe there is no country in the world in which ODC assemblies have not been installed yet. There is no other RRH interface which is used more often and which was chosen by more system vendors.

The success comes from the fact that ODC is an extremely robust outdoor connector which withstands all installation hazards – and most importantly – does not permit handling errors. ODC makes mobile networks more reliable and guarantees 100 % performance.

# Fiber optic interfaces for remote radio heads

## ODC®-4 outdoor connector

### Features

- 2 fibers, singlemode or multimode
- Compact design with 2 x 1.25 mm ferrules
- Extension connector for cable chaining
- Robust push-pull coupling mechanism – two clearly defined mating states
- Highest outdoor installation safety
- Waterproof, dust proof and corrosion resistant
- Waterproof protection caps available
- EMI protected
- RoHs compliant

## Q-XCO – quick-lock ruggedised SFP connector

### Features

- Quick-lock mating connector for remote radio head and industrial applications
- Ruggedised outdoor design with 2 × LC interface
- Plugs directly into SFP module, compatible with all standard SFP modules
- Full compensation of positioning tolerances and SFP module tolerances
- Bayonet, blind-mating mechanism and highest installation safety
- Full protection of optical interface during installation
- Access and exchange of SFP module possible
- RoHs compliant

## Mating mechanism

Mating	1-step blind mating	bayonet
	mating references	visual and latch
Compensation of positioning tolerances of SFP module	z-axis	± 2.25 mm
	x, y-axis	± 0.4 mm (± 0.6 mm depending on SFP module)
Latching of LC connector	use of LC HQ technology	automating latching and unlatching
Mating durability	IEC 61300-2-2	100 cycles
Force on SFP module		no force in mated state

## Specification

Technology		LC full ceramic ferrules	
Housing material	connector	high-performance plastic	
	socket	die-casting with zinc plating

## FullAXS – ruggedised sealing system

### Features

- Ruggedised sealing system for fiber-to-the-antenna and industrial applications
- Open bulkhead for easy access to SFP
- Positive mechanical feedback to operator when fully mated
- Duplex LC interface
- Robust bayonet locking for easy, fast and secure mating
- Waterproof, dust proof and corrosion resistant
- Expansion to RJ45 and power possible

## Specifications

Mating mechanism		bayonet style locking

# Antenna solutions

# Maximize performance with our versatile antenna portfolio for the mobile network

Our versatile antenna portfolio ranges from small cell to macrocell applications, including 5G and indoor Distributed Antenna System (DAS) antennas. They are applicable for rooftops and towers, street furniture, storefronts, private mobile networks, subway networks, hotels and more.

## Performance

Superior performance with maximum data throughput

## Frequency

Covering frequencies from 600 MHz to 6 GHz

## Installation

Simple and quick installation

## Versatile

Versatile products for use in diverse environments

## Customised

Customised solutions fitting all cell sites

# Macro passive antennas

At HUBER+SUHNER, connections are at the heart of everything we do. We connect communication systems to a reliable, future-ready physical layer that ensures performance, density, and scalability for today and beyond. Our Centre of Competence in Manesar, India, is dedicated to delivering cutting-edge Macro Antennas tailored to the needs of Original Equipment Manufacturers (OEMs), Telecom operators, and System integrators. Supported by a global team of in-house experts and technology partners, equipped with advanced design software and testing equipment, our antenna solutions are essential for enhancing mobile connectivity, providing reliable and robust performance even in the most challenging conditions.

HUBER+SUHNER offers both standard antennas and customized solutions tailored to your specific needs in terms of ports, frequency bands, dimensions, and packaging options. Our automated testing and advanced manufacturing techniques ensure competitive pricing without compromising quality. Adhering to the highest quality standards, our products are reliable and efficient. Comprehensive quality control is provided by accredited Advanced near/far-field Microwave Anechoic Testing Facilities and Environment Testing centers. Our production center is equipped for high-volume production, ensuring we meet your demands efficiently. Our Macro antennas are designed and rigorously tested to ensure full compliance with BASTA recommendations, guaranteeing performance and reliability for all your communication needs.

# Product nomenclature

To help you navigate our catalogue with ease and confidence, we've developed a clear and consistent product nomenclature system. This structured naming approach ensures that each product is easily identifiable by its key characteristics—such as category, model, version, and specifications.

In this section, you'll find a breakdown of how our product codes and names are constructed, what each element represents, and how this information can assist you in selecting the right product for your needs.

Let's take a closer look at how our products are named—and what that means for you.

## Example: 10P65T3T-1718DD

Multi Band 10 - Port Antenna  
690~960/3x1710~2690MHz  
65°/ 65° Horizontal Beam Width

Unique specifications definition			
Mark	Contents	Mark	Contents
DC	Diplexer Combine	HG	High Gain (Low loss feeding)
I	ICS	T	Tri Sector
N	Null Fill	B	Bi Directional
P	Pole Type	D	Dual Beam

# Passive sector macro antenna platforms

Our advanced macro antenna solutions include three mainstream platforms: Multiband, TDD+FDD, and Hybrid/Dual Beam, each designed to optimize performance, enhance connectivity, and meet the diverse needs of modern wireless networks.

To ensure easy identification and standardization, the Antenna Interface Standards Group (AISG) has assigned specific color codes to different frequency ranges. Below is a comprehensive list of these color codes and sample layouts of 16P and 12P antennas based on these color codes.

Band edge range	Band Colour (RAL)	Band Character	
380 to 1000 MHz	Red (RAL 3020)	R	Low Band (LB)
1001 to 1700 MHz	Green (RAL 6029)	G	Low Band (LB)
1701 to 2300 MHz	Blue (RAL 5015)	B	High Band (HB)
2301 to 3000 MHz	Yellow (RAL 1023)	Y	High Band (HB)
3001 to 5000 MHz	Purple (RAL 4006)	P	High Band (HB)
5001 to 6000 MHz	Orange (RAL 2009)	O	High Band (HB)

## Multiband

**Single Band (2P):**

- LB
- HB

**Dual Band (4P):**

- LB × 2
- HB × 2
- LB + HB

**Triple Band (6P):**

- LB + HB × 2
- HB × 3

**Quad Band (8P):**

- LB + HB × 3
- LB × 2 + HB × 2
- HB × 4

**Penta Band (10P):**

- LB + HB × 4
- LB × 2 + HB × 3

**Hexa Band (12P):**

- LB + HB × 5
- LB × 2 + HB × 4

**Hepta Band (14P):**

- LB × 2 + HB × 5
- LB + HB × 6

**Octa Band (16P):**

- LB × 2 + HB × 6

**TDD + FDD**

**4 Port Dual Beam Antenna**

**8 Port Dual Beam Antenna**

**12 Port Hybrid Antenna**

**16 Port Hybrid Antenna**

**SENCITY® Sector Multi Band**

Product name	<b>SENCITY Sector Multi Band 8 Port HB</b>
Product ID.	<b>8P65HT-18V1</b>
Description	<ul style="list-style-type: none"> <li>• Multi Band 8-Port Antenna (4×1710-2690 MHz), with Integrated Remote Electrical Down tilt, continuously adjustable</li> <li>• Horizontal beam width of 65°</li> <li>• PIM &lt;-150 dBc (2×43 dBm)</li> <li>• For outdoor application</li> <li>• Mounting brackets are included</li> </ul>
Item no.	85138407

Technical Data	Band 1	Band 2	Band 3	Band 4	Band 5
Frequency	1710 – 1880 MHz	1850 – 1990 MHz	1920 – 2170 MHz	2300 – 2400 MHz	2500 – 2690 MHz
VSWR	1.5	1.5	1.5	1.5	1.5
Gain	17.1 ±0.5 dBi	17.4 ±0.4 dBi	17.6 ±0.5 dBi	18 ±0.4 dBi	18 ±0.5 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	8
Composite power max.	300 W
Polarization	±45°
Electrical Down tilt	0-10°

Mechanical data	
Dimensions (Height x Width x Depth)	1400 × 520 × 170 mm
Weight	16.5 kg
Mast Dia	40 – 115 mm
Mechanical Downtilt	0-20 °
Wind load	Frontal: 947.6 N @150km/h, Lateral: 309.8 N @150 km/h
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	ASA

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Sector Multi Band**

Product name	<b>SENCITY Sector Multi Band 10-Port LB/HB</b>
Product ID.	<b>10P65T4T-1718</b>
Description	<ul style="list-style-type: none"> <li>• Multi Band 10-Port Antenna (1×698-960/4×1710-2690 MHz) with Integrated Remote Electrical downtilt, continuously adjustable</li> <li>• Horizontal beam width of 65°</li> <li>• PIM &lt; -150 dBc (2×43 dBm)</li> <li>• For outdoor application</li> <li>• Mounting brackets included</li> </ul>
Item no.	85138043

Technical Data	Band 1	Band 2	Band 3	Band 4	Band 5	Band 6	Band 7	Band 8
Frequency	698 MHz – 806 MHz	790 MHz – 894 MHz	880 MHz – 960 MHz	1710 MHz – 1880 MHz	1850 MHz – 1990 MHz	1920 MHz – 2170 MHz	2300 MHz – 2400 MHz	2500 MHz – 2690 MHz
VSWR	1.5	1.5	1.5	1.5	1.5	1.5	1.5	1.5
Gain	15.9 dBi	16.2 dBi	16.8 dBi	17.1 dBi	17.3 dBi	17.5 dBi	17.7 dBi	18 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	10
Composite power max.	300 W
Polarization	±45°
Electrical Down tilt	0-10°

Mechanical data	
Dimensions (Height × Width × Depth)	2400 mm × 375 mm × 170 mm
Weight	34 kg
Mast Dia	40 mm – 115 mm
Wind load	front: 1166.9 N at 150 km/h, lateral: 529 N at 150 km/h
Wind Speed survival	Wind Speed survival: 216 km/h

Material data	
Radome colour	Grey
Radome material	FRP

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Sector Multi Band**

Product name	<b>SENCITY Sector Multi Band 12-Port LB/HB</b>
Product ID.	<b>12P652T4T-1718V8</b>
Description	Multi Band 12-Port Antenna (2×698 - 960 / 4×1710 - 2690 MHz) Integrated Remote Electrical downtilt, continuously adjustable <ul style="list-style-type: none"> <li>• Horizontal beam width of 65°</li> <li>• PIM &lt; -150 dBc (2×43 dBm)</li> <li>• For outdoor application</li> <li>• Mounting brackets included</li> </ul>
Item no.	85246830

Technical Data	Band 1	Band 2	Band 3	Band 4	Band 5	Band 6	Band 7	Band 8
Frequency	690 MHz – 806 MHz	790 MHz – 894 MHz	880 MHz – 960 MHz	1695 MHz – 1880 MHz	1850 MHz – 1990 MHz	1920 MHz – 2170 MHz	2300 MHz – 2400 MHz	2500 MHz – 2690 MHz
VSWR	1.5	1.5	1.5	1.5	1.5	1.5	1.5	1.5
Gain	15.7 ±0.6 dBi	16.2 ±0.5 dBi	16.4 ±0.4 dBi	16.7 ± 0.5 / 16.3 ± 0.5 dBi	17 ± 0.6 / 16.6 ± 0.6 dBi	17.2 ± 0.7 / 16.6 ± 0.6 dBi	17.9 ± 0.6 / 17.3 ± 0.6 dBi	18 ± 0.7 / 17.4 ± 0.7 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	12
Composite power max.	300 W
Polarization	±45°
Electrical Down tilt	0-10°

Mechanical data	
Dimensions (Height × Width × Depth)	2665 mm × 480 mm × 170 mm
Weight	32.3 kg
Mast Dia	40 mm – 115 mm
Wind load	front: 1079.6 N at 150 km/h, lateral: 487.9 N at 150 km/h,
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	FRP

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Sector Multi Band**

Product name	<b>SENCITY Sector Multi Band 12-Port LB/HB</b>
Product ID.	<b>12P65T2D2E-1517DD</b>
Description	Multi Band 12-Port Antenna (698-806 / 824-960 / 2×1710-1880 / 2×2300 - 2400 MHz) Integrated Remote Electrical downtilt, continuously adjustable <ul style="list-style-type: none"> <li>• Horizontal beam width of 65°</li> <li>• PIM &lt; -150 dBc (2×43 dBm)</li> <li>• For outdoor application</li> <li>• Mounting brackets included</li> </ul>
Item no.	85119872

Technical Data	Band 1	Band 2	Band 3	Band 4
Frequency	698 MHz – 806 MHz	824 MHz – 960 MHz	1710 MHz – 1880 MHz	2300 MHz – 2400 MHz
VSWR	1.5	1.5	1.5	1.5
Gain	14 ±0.5 dBi	14 ±0.5 dBi	17 ±0.5 dBi	17 ±0.5 dBi
Electrical Down tilt	2-14°	2-14°	0-10°	0-10°

Electrical data	
Impedance	50 Ω
Number of Ports	12
Composite power max.	500 W
Polarization	±45°

Mechanical data	
Dimensions (Height × Width × Depth)	1600 mm × 375 mm × 170 mm
Weight	24 Kg
Mast Dia	40 mm – 115 mm
Wind load	front: 781 N at 150 km/h, lateral: 354.1 N at 150 km/h,
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	FRP

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Sector Dual Beam HB**

Product name	<b>SENCITY Sector 8-Ports Dual Beam HB</b>
Product ID.	<b>8P30HE-19D</b>
Description	<ul style="list-style-type: none"> <li>• High Band 8-Port Dual Beam Antenna (4 × 2300 - 2400 MHz)</li> <li>• Integrated Remote Electrical downtilt, continuously adjustable</li> <li>• For outdoor application</li> <li>• Mounting brackets included</li> </ul>
Item no.	85141763

<b>Technical Data</b>	<b>Band 1</b>
Frequency	2300 MHz – 2400 MHz
VSWR	1,5
Gain	19,6 ± 0,5 / 19 ± 0,5 dBi

<b>Electrical data</b>	
Impedance	50 Ω
Number of Ports	8
Composite power max.	250 W
Polarization	±45°
Electrical Down tilt	0-10°

<b>Mechanical data</b>	
Dimensions (Height × Width × Depth)	2200 mm × 330 mm × 155 mm
Weight	25 kg
Mast Dia	40 mm – 115 mm
Wind load	945 N at 150 km/h, lateral: 4439 N at 150 km/h,
Wind Speed survival	216 km/h

<b>Material data</b>	
Radome colour	Grey
Radome material	FRP

<b>Environmental data</b>	
Operation temperature	-40°C – 70°C

**SENCITY® Sector Dual Beam**

Product name	<b>SENCITY Sector Dual Beam 4 Port Antenna LB</b>
Product ID.	<b>4P35LS-17D</b>
Description	<ul style="list-style-type: none"> <li>• Low Band 4-Port Dual Beam Antenna (824~896MHz) with integrated Remote Electrical Down tilt, continuously adjustable</li> <li>• Horizontal beam width of 35 degree</li> <li>• PIM &lt; -150 dBc (2x43 dBm)</li> <li>• Mounting brackets are included</li> </ul>
Item no.	85116828

Technical Data	Band 1
Frequency	824 - 896 MHz
VSWR	1.5
Gain	16.5 ± 0.5 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	4
Composite power max.	500 W
Polarization	±45°
Electrical Down tilt	2 - 14°

Mechanical data	
Dimensions (Height x Width x Depth)	1450 mm x 565 mm x 170 mm
Weight	18 kg
Mast Dia	40 mm – 115 mm
Wind load	1066.4 N at 150 km/h, Lateral: 320.9 N at 150 km/h
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	FRP

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Sector Multi Band**

Product name	<b>SENCITY Sector Multi Band 2-Port Antenna HB</b>
Product ID.	<b>2P30HYZ-17T0DC</b>
Description	Multi Band 2-Port Antenna with built in Diplexer (2400~2484 / 5150~5875MHz) <ul style="list-style-type: none"> <li>• Horizontal beam width of 30 degree</li> <li>• Mounting brackets are included</li> </ul>
Item no.	85150648

Technical Data	Band 1	Band 2
Frequency	2400 – 2484 MHz	5150 – 5875 MHz
VSWR	1.5	1.5
Gain	16.8 dBi	17 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	2
Composite power max.	50 W
Polarization	±45°

Mechanical data	
Dimensions (Height x Width x Depth)	450 mm x 265 mm x 99 mm
Weight	2.5 kg
Wind load	155.2 N at 150 km/h, Lateral: 58 N at 150 km/h
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	ASA

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Sector Multi Band**

Product name	<b>SENCITY Sector Multi Band 2 Port Antenna LB</b>
Product ID.	<b>2P33LK-21</b>
Description	Multi Band 2 Port Antenna (1x698~894MHz) with integrated Remote Electrical Down tilt, continuously adjustable <ul style="list-style-type: none"> <li>• Horizontal beam width of 33 degree</li> <li>• PIM &lt;-150 dBc (2x43 dBm)</li> <li>• Mounting brackets are included</li> </ul>
Item no.	85201961

Technical Data	Band 1	Band 2
Frequency	698 – 806 MHz	790 – 894 MHz
VSWR	1.5	1.5
Gain	19.9 ± 0.6 dBi	20.5 ± 0.6 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	2
Composite power max.	300 W
Polarization	±45°
Electrical Down Tilt	0 - 10°

Mechanical data	
Dimensions (Height x Width x Depth)	2695 mm x 565 mm x 170 mm
Weight	30 kg
Mast Diameter	40mm - 115 mm
Wind load	Frontal : 1982 N at 150 km/h, Lateral: 596.4 N at 150 km/h
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	FRP or ASA

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Sector Multi Band**

Product name	<b>SENCITY Sector Multi band 2 Port Antenna LB</b>
Product ID.	<b>2P65LW-17</b>
Description	Multi Band 2-Port Antenna (1×690~960MHz) with integrated Remote Electrical Down tilt, continuously adjustable <ul style="list-style-type: none"> <li>• Horizontal beam width of 65 degree</li> <li>• PIM &lt;-150 dBc (2×43 dBm)</li> <li>• Mounting brackets are included</li> </ul>
Item no.	85219202

Technical Data	Band 1	Band 2	Band 3
Frequency	617 - 698 MHz	698 – 806 MHz	790 - 894 MHz
VSWR	1.5	1.5	1.5
Gain	15.6 ± 0.6 dBi	16.1 ± 0.6 dBi	16.5 ± 0.6 dB

Electrical data	
Impedance	50 Ω
Number of Ports	2
Composite power max.	300W
Polarization	±45°
Electrical Down Tilt	0 - 8°

Mechanical data	
Dimensions (Height × Width x Depth)	2575 mm × 295 mm × 145 mm
Weight	19 kg
Wind load	Frontal : 988.8 N at 150 km/h, Lateral: 486 N at 150 km/h
Mast Diameter	40mm - 115 mm
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	ASA

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Sector Multi Band**

Product name	<b>SENCITY Sector Multi band 6 Port Antenna HB</b>
Product ID.	<b>6P65HT-18V4</b>
Description	Multi Band 6-Port Antenna (3x1710~2690MHz) with integrated Remote Electrical Down tilt, continuously adjustable <ul style="list-style-type: none"> <li>• Horizontal beam width of 65 degree</li> <li>• PIM &lt;-150 dBc (2x43 dBm)</li> <li>• Mounting brackets are included</li> </ul>
Item no.	85195396

Technical Data	Band 1
Frequency	1710 – 2690 MHz
VSWR	1.5
Gain	18.5 ± 0.7 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	6
Composite power max.	300 W
Polarization	±45°
Electrical Down Tilt	0 - 10°

Mechanical data	
Dimensions (Height x Width x Depth)	1360 mm x 398 mm x 141 mm
Weight	14 kg
Mast Diameter	40mm - 115 mm
Wind load	Frontal : 704.6 N at 150 km/h, Lateral: 249.6 N at 150 km/h
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	UVPVC

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Sector Multi Band**

Product name	<b>SENCITY Sector Multi band 2 Port Antenna LB</b>
Product ID.	<b>2P65LT-18V2</b>
Description	Multi Band 2-Port Antenna (1x690~960MHz) with integrated Remote Electrical Down tilt, continuously adjustable <ul style="list-style-type: none"> <li>• Horizontal beam width of 65 degree</li> <li>• PIM &lt;-150dBc (2x43 dBm)</li> <li>• Mounting brackets are included</li> </ul>
Item no.	85195393

Technical Data	Band 1	Band 2	Band 3
Frequency	690 - 806 MHz	790 - 894 MHz	880 - 960 MHz
VSWR	1.5	1.5	1.5
Gain	16.4 ± 0.5 dBi	17 ± 0.5 dBi	17.4 ± 0.5 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	2
Composite power max.	300W
Polarization	±45°
Electrical Down Tilt	0 - 10°

Mechanical data	
Dimensions (Height x Width x Depth)	695 mm x 295 mm x 145 mm
Weight	20 kg
Wind load	Frontal : 1034.9 N at 150 km/h, Lateral: 508.7 N at 150 km/h
Mast Diameter	40mm - 115 mm
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	FRP/ASA/UPVC

Environmental data	
Operation temperature	-40°C - 70°C

**SENCITY® High Band**

Product name	<b>SENCITY Sector High Band 8 Port Antenna HB</b>
Product ID.	<b>8P65HDE-17DS</b>
Description	High Band 8-Port Antenna (2×1710~1880 / 2×2300~2400MHz) with integrated Remote Electrical Downtilt, continuously adjustable <ul style="list-style-type: none"> <li>• Horizontal beam width of 65 degree</li> <li>• PIM &lt;-150 dBc (2×43 dBm)</li> <li>• Mounting brackets are included</li> </ul>
Item no.	85171678

Technical Data	Band 1	Band 2
Frequency	1710 - 1880 MHz	2300 - 2400 MHz
VSWR	1.5	1.5
Gain	16.5 ± 0.5 dBi	17 ± 0.5 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	8
Composite power max.	250 W
Polarization	±45°
Electrical Down Tilt	0 - 10°

Mechanical data	
Dimensions (Height × Width × Depth)	1360 mm × 320 mm × 105 mm
Weight	14 kg
Mast Diameter	40mm - 115 mm
Wind load	Frontal : 566.5 N at 150 km/h, Lateral: 185.9 N at 150 km/h
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	FRP

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® High Band**

Product name	<b>SENCITY Sector High Band 4 Port Antenna HB</b>
Product ID.	<b>4P65HD-17</b>
Description	High Band 4-Port Antenna (2×1710~1880MHz) with integrated Remote Electrical Down tilt, continuously adjustable <ul style="list-style-type: none"> <li>• Horizontal beam width of 65 degree</li> <li>• PIM &lt;-150 dBc (2×43 dBm)</li> <li>• Mounting brackets are included</li> </ul>
Item no.	85127320

Technical Data	Band 1
Frequency	1710 – 1880 MHz
VSWR	1.5
Gain	17 ± 0.5 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	4
Composite power max.	250W
Polarization	±45°
Electrical Down Tilt	0 - 10°

Mechanical data	
Dimensions (Height × Width x Depth)	1400 mm × 320 mm × 105 mm
Weight	12 kg
Wind load	Frontal : 583.1 N at 150 km/h, Lateral: 191.3 N at 150 km/h
Mast Diameter	40mm - 115 mm
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	FRP

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Multi Band**

Product name	<b>SENCITY Sector Multi Band 2 Port Antenna LB</b>
Product ID.	<b>2P65LK-16I</b>
Description	Multi Band 2-Port Antenna (703~894MHz) with integrated Remote Electrical Down tilt, continuously adjustable <ul style="list-style-type: none"> <li>• Horizontal beam width of 65 degree</li> <li>• PIM &lt;-153 dBc (2x43 dBm)</li> <li>• Mounting brackets are included</li> </ul>
Item no.	84420367

Technical Data	Band 1	Band 2	Band 3
Frequency	703 - 803 MHz	791 - 862 MHz	824 - 894 MHz
VSWR	1.4	1.4	1.4
Gain	15.6 ± 0.5 dBi	15.9 ± 0.4 dBi	16 ± 0.4 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	2
Composite power max.	300 W
Polarization	±45°
Electrical Down Tilt	0 - 10°

Mechanical data	
Dimensions (Height x Width x Depth)	1850 mm x 295 mm x 145 mm
Weight	12 kg
Mast Diameter	40mm - 115 mm
Wind load	Frontal : 712 N at 150 km/h, Lateral: 350 N at 150 km/h
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	ASA (UV resistant)

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Sector Canister HB**

Product name	<b>SENCITY Omni 4-Port Canister HB</b>
Product ID.	<b>4P360HT-12T2</b>
Description	<ul style="list-style-type: none"> <li>• Quasi-Omni Broad Band 4-Port Antenna (1710-2690 MHz)</li> <li>• PIM &lt; -150 dBc (2×43 dBm)</li> <li>• Fixed electrical downtilt of 2°</li> <li>• Mounting brackets are included</li> </ul>
Item no.	84416118

Technical Data	Band 1	Band 2	Band 3	Band 4	Band 5
Frequency	1710 MHz – 1880 MHz	1850 MHz – 1990 MHz	1920 MHz – 2170 MHz	2300 MHz – 2400 MHz	2500 MHz – 2690 MHz
VSWR	1.5	1.5	1.5	1.5	1.5
Gain	11.3 dBi	11.6 dBi	11.9 dBi	12.2 dBi	12.5 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	4
Composite power max.	200 W
Polarization	±45°
Electrical Down tilt	2°, fixed

Mechanical data	
Dimensions (Height x Diameter)	1200 mm x 250 mm
Weight	16 kg
Mast Dia	40 mm – 115 mm
Mechanical Downtilt	
Wind load	227 N at 150 km/h
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	ASA

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Sector Canister HB**

Product name	<b>SENCITY Tri-sector 6-Port Canister HB</b>
Product ID.	<b>6P70HT-15T2TS</b>
Description	<ul style="list-style-type: none"> <li>• Multi Band 3-Sector 6-Port Antenna (3×1710-2690MHz)</li> <li>• PIM &lt; -150 dBc (2×43 dBm)</li> <li>• Fixed electrical downtilt of 2°</li> <li>• For outdoor application</li> <li>• Mounting brackets are included</li> </ul>
Item no.	85138042

Technical Data	Band 1	Band 2	Band 3	Band 4	Band 5
Frequency	1710 MHz – 1880 MHz	1850 MHz – 1990 MHz	1920 MHz – 2170 MHz	2300 MHz – 2400 MHz	2500 MHz – 2690 MHz
VSWR	1.5	1.5	1.5	1.5	1.5
Gain	14 dBi	14.2 dBi	14.5 dBi	14.9 dBi	15.2 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	6
Composite power max.	200 W
Polarization	±45°
Electrical Down tilt	2°, fixed

Mechanical data	
Dimensions (Height x Diameter)	700 mm × 200 mm
Weight	6.6 kg
Mast Dia	40 mm – 115 mm
Mechanical Downtilt	0 - 2°
Wind load	106.5 N at 150 km/h wind velocity
Wind Speed survival	216 km/h

Material data	
Radome colour	Grey
Radome material	ASA

Environmental data	
Operation temperature	-40°C – 70°C

# Small cell and Distributed Antenna System (DAS) antennas

In today's fast-paced world, increasing network capacity while reducing expenses is essential for the sustainability and growth of wireless communication infrastructure. By providing small cells and DAS antennas, we address key issues such as efficient use of power, optimal space utilization, and cost-effective network connections. This ensures that infrastructure providers can meet the increasing demand for high-speed, reliable wireless communication without incurring prohibitive costs. Our solutions make it feasible to deploy and maintain robust networks, ultimately benefiting both providers and end-users with improved connectivity and service quality. We provide solutions that fit various physical spaces, with simple installation processes and that enhance your overall network efficiency.

## Street furniture

The most efficient way to deploy small cells is by utilizing preexisting assets. These assets are typically located close to people and are usually already connected to the power grid and communication network. Examples include advertising pillars, bus shelters, and street lights.

Advertising pillar

Bus shelter

Street light

To increase indoor capacity and offload the macrocell network, in-building coverage requires appealing, easy-to-install solutions that can be seamlessly integrated into interior design.

Airport

In-building coverage

Campus

**SENCITY® Occhio**

Product name	<b>SENCITY Occhio</b>
Product ID.	<b>1399.32.0016</b>
Description	<ul style="list-style-type: none"> <li>• Indoor omnidirectional antenna for 3G/4G and 5G mid bands</li> <li>• Supports MIMO 4×4 in the cellular bands from 1695 MHz till 6000 MHz</li> <li>• VSWR 1.5 in all bands with Vertical polarization</li> <li>• PIM better than -153 dBc at 2×43 dBm</li> <li>• Smart bracket system is included</li> <li>• Nex10 female connector</li> </ul>
Item no.	85137888

Technical Data	Band 1	Band 2	Band 3	Band 4
Frequency	1695 MHz – 2690 MHz	3300 MHz – 4200 MHz	4500 MHz – 5000 MHz	5150 MHz – 6000 MHz
VSWR	1.5	1.5	1.5	1.5
Gain	4 dBi	4.5 dBi	6.5 dBi	6.5 dBi
Electrical Down tilt	2-14°	2-14°	0-10°	0-10°

**Electrical data**

Impedance	50 Ω
Number of Ports	4
Composite power max.	38 W
Polarization	vertical

**Mechanical data**

Dimensions (Height x Diameter)	32 mm × 200 mm
Weight	0.29 kg

**Material data**

Radome colour	Grey
Radome material	ASA

**Environmental data**

Operation temperature	-40°C – 70°C
-----------------------	--------------

**SENCITY® Occhio**

Product name	<b>SENCITY Occhio PLUS</b>
Product ID.	<b>1399.32.0020</b>
Description	<ul style="list-style-type: none"> <li>• Indoor Omnidirectional antenna for 3G/4G/5G cellular bands</li> <li>• Supports MIMO 4×4 in the cellular bands from 617 MHz till 6000 MHz</li> <li>• Vertical polarization</li> <li>• PIM better than -153 dBc at 2×43 dBm</li> <li>• Smart bracket system is included</li> <li>• Nex10 female connector</li> </ul>
Item no.	85189602

Technical Data	Band 1	Band 2	Band 3	Band 4	Band 5
Frequency	617 MHz × 960 MHz	1427 MHz × 1660 MHz	1695 MHz × 2690 MHz	3300 MHz × 4200 MHz	4500 MHz × 6000 MHz
VSWR	2	1.8	1.7	1.7	1.7
Gain	3 dBi	4 dBi	4 dBi	4 dBi	5 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	4
Composite power max.	16 W
Polarization	vertical

Mechanical data	
Dimensions (Height x Diameter)	45 mm × 275 mm
Weight	0.89 kg

Material data	
Radome colour	White
Radome material	PC (Polycarbonate)

Environmental data	
Operation temperature	-0°C – 55°C

**SENCITY® Occhio**

Product name	<b>SENCITY Occhio PLUS</b>
Product ID.	<b>1399.32.0021</b>
Description	<ul style="list-style-type: none"> <li>• Indoor Omnidirectional antenna for 3G/4G/5G cellular bands</li> <li>• Supports MIMO 2×2 in the cellular bands from 617 MHz till 6000 MHz</li> <li>• Vertical polarization</li> <li>• PIM better than -153 dBc at 2×43 dBm</li> <li>• Smart bracket system is included</li> <li>• Nex10 female connector</li> </ul>
Item no.	85200712

Technical Data	Band 1	Band 2	Band 3	Band 4	Band 5
Frequency	617 MHz – 960 MHz	1427 MHz – 1660 MHz	1695 MHz – 2690 MHz	3300 MHz – 4200 MHz	4500 MHz – 6000 MHz
VSWR	1.8	1.8	1.7	1.7	1.7
Gain	3 dBi	3 dBi	3 dBi	4 dBi	5 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	4
Composite power max.	16 W
Polarization	vertical

Mechanical data	
Dimensions (Height x Diameter)	45 mm × 275 mm
Weight	0.89 kg

Material data	
Radome colour	White
Radome material	PC (Polycarbonate)

Environmental data	
Operation temperature	-0°C – 55°C

**SENCITY® Rondo**

Product name	<b>SENCITY Rondo</b>
Product ID.	<b>1399.31.0007</b>
Description	<ul style="list-style-type: none"> <li>• Indoor Omnidirectional antenna for 3G/4G/5G cellular bands</li> <li>• Supports MIMO 2x2 in the cellular bands from 617 MHz till 4200 MHz</li> <li>• Vertical polarization</li> <li>• PIM better than -153 dBc at 2x43 dBm</li> <li>• Ceiling flush mount installation</li> <li>• Plenum rated cable terminated with 4310 female connector</li> </ul>
Item no.	85086028

Technical Data	Band 1	Band 2	Band 3	Band 4	Band 5	Band 6	Band 7	Band 8
Frequency	617 MHz × 698 MHz	698 MHz × 790 MHz	790 MHz × 960 MHz	1695 MHz – 2180 MHz	2180 MHz – 2400 MHz	2400 MHz – 2500 MHz	2500 MHz – 2690 MHz	3300 MHz – 4200 MHz
VSWR	1.8	1.9	2	1.6	1.6	1.5	1.5	2
Gain	2.5 dBi	3.5 dBi	4.5 dBi	5 dBi	6 dBi	6.5 dBi	6.5 dBi	5.5 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	2
Composite power max.	50 W
Polarization	vertical

Mechanical data	
Dimensions (Height x Diameter)	87 mm × 238 mm
Weight	0.82 kg

Material data	
Radome colour	White
Radome material	PC (Polycarbonate)

Environmental data	
Operation temperature	-45°C – 70°C

**SENCITY® Urban**

Product name	<b>SENCITY Urban 100</b>
Product ID.	<b>1399.17.0253</b>
Description	<ul style="list-style-type: none"> <li>• Outdoor Omnidirectional antenna for 4G/5G mid cellular bands</li> <li>• Supports MIMO 2x2 in the cellular bands from 2500MHz till 4200 MHz</li> <li>• Vertical and horizontal polarization</li> <li>• PIM better than -150 dBc at 2x43 dBm</li> <li>• IP66 rating</li> <li>• Plenum rated cable terminated with N female connector</li> </ul>
Item no.	85106726

Technical Data	Band 1	Band 2	Band 3
Frequency	2500 MHz ... 2690 MHz	3300 MHz ... 3800 MHz	3800 MHz ... 4200 MHz
VSWR	2	2	2
Gain	2 dBi	2.5 dBi	2.5 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	2
Composite power max.	100 W
Polarization	vertical

Mechanical data	
Dimensions (Height x Diameter)	96 mm x 117 mm
Weight	0.45 kg
Wind load	IEC 60721-3-3 with max wind speed 180Km/h

Material data	
Radome colour	RAL 7035 (light-grey)

Radome material	PC (Polycarbonate)

Environmental data	
Operation temperature	-40°C – 70°C

## SENCITY® Urban

Product name	<b>SENCITY Urban 200</b>
Product ID.	<b>1399.17.0272</b>
Description	<ul style="list-style-type: none"> <li>• Outdoor Directional antenna for 5G mid cellular bands</li> <li>• Supports MIMO 4×4 in the cellular bands from 3300 MHz till 4200 MHz</li> <li>• Gain of 11 dBi</li> <li>• Half power beamwidth of 70° (horizontal) and 35° (vertical)</li> <li>• Dual slant polarization</li> <li>• IP67 rating</li> <li>• PIM better than -150 dBc at 2×43 dBm</li> <li>• N female connector</li> </ul>
Item no.	85178889

Technical Data	Band 1	Band 2
Frequency	3300 MHz – 3800 MHz	3800 MHz – 4200 MHz
VSWR	1.8	1.8
Gain	11 dBi	11 dBi
Composite power max.	95 W	90 W

Electrical data	
Impedance	50 Ω
Number of Ports	4
Polarization	Port 1: -45° slant Port 2: +45° slant Port 3: -45° slant Port 4: +45° slant

Mechanical data	
Dimensions (Height x Width x Depth)	184.8 mm × 164.6 mm × 84.2 mm
Weight	0.59 kg

Material data	
Radome colour	RAL 7035 (light-grey)
Radome material	PC (Polycarbonate)

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Urban**

Product name	<b>SENCITY Urban 200</b>
Product ID.	<b>1399.31.0273</b>
Description	<ul style="list-style-type: none"> <li>• Outdoor Directional antenna for 4G and 5G mid cellular bands</li> <li>• Supports MIMO 2×2 in 4G in the cellular bands from 1700 MHz till 2700 MHz</li> <li>• Supports MIMO 4×4 in 5G in the cellular bands from 3400 MHz till 4200 MHz</li> <li>• Gain of 7 dBi</li> <li>• Half power beamwidth of 80° (horizontal) and 85° (vertical)</li> <li>• Dual slant polarization</li> <li>• IP67 rating</li> <li>• PIM better than -150 dBc at 2×43 dBm</li> <li>• Plenum rated cable terminated with 4310 female connector</li> </ul>
Item no.	85224309

Technical Data	Band 1	Band 2	Band 3	Band 4	Band 5
Frequency	1710 MHz – 1880 MHz	2500 MHz – 2700 MHz	2500 MHz – 2700 MHz	3400 MHz – 3600 MHz	3800 MHz – 4200 MHz
VSWR	2	1.5	1.9	1.5	1.6
Gain	7 dBi	7 dBi	6.5 dBi	6 dBi	5 dBi
Composite power max.	45 W	42 W	40 W	18 W	16 W

Electrical data	
Impedance	50 Ω
Number of Ports	6
Polarization	Port 1: +45° slant Port 2: -45° slant Port 3: +45° slant Port 4: -45° slant Port 5: +45° slant Port 6: -45° slant

Mechanical data	
Dimensions (Height x Width x Depth)	184.8 mm × 164.6 mm × 84.2 mm
Weight	0.8 kg

Material data	
Radome colour	RAL 7035 (light-grey)
Radome material	PC (Polycarbonate)

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® Urban**

Product name	<b>SENCITY Urban 300</b>
Product ID.	<b>1399.31.0019</b>
Description	<ul style="list-style-type: none"> <li>• Outdoor Directional antenna for 4G/5G cellular bands</li> <li>• Supports MIMO 2x2 in the cellular bands from 698 MHz till 4200 MHz</li> <li>• Gain of 7 dBi</li> <li>• Half power beamwidth of 65° (horizontal) and 65° (vertical)</li> <li>• Dual slant polarization</li> <li>• IP67 rating</li> <li>• PIM better than -150 dBc at 2x43 dBm</li> <li>• Plenum rated cable terminated with 4310 female connector</li> </ul>
Item no.	85184287

Technical Data	Band 1	Band 2	Band 3
Frequency	698 MHz – 960 MHz	1695 MHz – 2700 MHz	3100 MHz – 4200 MHz
VSWR	1.8	1.7	1.6
Gain	5 dBi	7 dBi	6.5 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	2
Composite power max.	50 W
Polarization	Port 1: +45° slant Port 2: -45° slant

Mechanical data	
Dimensions (Height x Diameter)	260 mm × 200 mm × 90 mm
Weight	1.1 kg

Material data	
Radome colour	RAL 7035 (light-grey)
Radome material	PC (Polycarbonate)

Environmental data	
Operation temperature	-40°C – 70°C

**SENCITY® OMNI**

Product name	<b>SENCITY OMNI-M stick antenna</b>
Product ID.	<b>1399.17.0231</b>
Description	<ul style="list-style-type: none"> <li>• Outdoor Omnidirectional stick antenna for 3G/4G cellular bands</li> <li>• Supports the cellular bands from 790 MHz till 2690 MHz</li> <li>• Gain of 3 dBi</li> <li>• PIM better than -143 dBc at 2×43 dBm</li> <li>• IP67 rating</li> <li>• N female connector</li> </ul>
Item no.	85027954

Technical Data	Band 1	Band 2
Frequency	790 MHz – 960 MHz	1710 MHz – 2690 MHz
VSWR	2	1.9
Gain	2 dBi	3 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	1
Composite power max.	25
Polarization	vertical

Mechanical data	
Dimensions (Height x Diameter)	263 mm × 32 mm
Weight	0.4 kg

Material data	
Radome colour	RAL 9003 (signal white)
Radome material	Glass Fibre

Environmental data	
Operation temperature	-40°C – 85°C

**SENCITY® OMNI**

Product name	<b>SENCITY Omni-S Thimble</b>
Product ID.	<b>1399.17.0224</b>
Description	<ul style="list-style-type: none"> <li>• Outdoor Omnidirectional compact broadband stick antenna for 4G/5G mid cellular bands and Wi-Fi 7 bands.</li> <li>• Supports the cellular bands from 1710 MHz till 7125 MHz</li> <li>• Gain of 3 dBi</li> <li>• IP69K rating</li> <li>• Direct mount on N type interface of wireless access points</li> </ul>
Item no.	85012283

Technical Data	Band 1	Band 2	Band 3	Band 4	Band 5	Band 6
Frequency	1710 MHz – 2000 MHz	2000 MHz – 2700 MHz	2700 MHz – 4200 MHz	4900 MHz – 5150 MHz	5150 MHz – 5925 MHz	5925 MHz – 7125 MHz
VSWR	2	2	2	2	2	2
Gain	1.5 dBi	2 dBi	1.5 dBi	2.5 dBi	2.5 dBi	3 dBi

Electrical data	
Impedance	50 Ω
Number of Ports	1
Composite power max.	120 W
Polarization	vertical

Mechanical data	
Dimensions (Height × Diameter)	55 mm × 22 mm
Weight	0.05 kg

Material data	
Radome colour	RAL 7043 (dark grey)
Radome material	ASA (acrylic ester-styrene-acrylonitrile)

Environmental data	
Operation temperature	-40°C – 85°C

# Conventional cell site solutions

# Work together with an expert for wireless connectivity solutions

---

## Flexibility for your network architecture

### One stop shop

Wireless infrastructure implies different technologies as radio frequency and fiber optics. HUBER+SUHNER copes with fiber optic and radio frequency and has for each application the suitable solution at hand. One stop shop reduces complexity for the purchaser and opens up additional economic potential.

---

## Reduced operational costs

### Performance

We constantly strive to optimise our products and pay special attention to the robustness of our RF components in order to guarantee a high electrical and mechanical reliability. Higher network efficiency and less maintenance leads to lower operational costs.

---

## Expertise at your service

### Local support

The successful deployment of wireless infrastructure requires strong local engineering and implementations capabilities. HUBER+SUHNER is close to the customer and provides local sales and engineering support.

# LISCA – RF jumpers

LISCA cable assemblies are specially developed for applications where low VSWR and low attenuation combined with low intermodulation products are required. The excellent performance is achieved by utilising corrugated cables with low intermodulation connectors and a controlled assembly process with HUBER+SUHNER solder technology.

LISCA jumpers are factory-made cable assemblies and can be ordered in different lengths. A hot-polyamide moulding between connector and cable jacket guarantees highest stability and tightness.

## **Benefits**

RoHS compliant (2011/65/EU)

Wide variety of corrugated cable and connector types

Standard products as well as customised assemblies with special lengths and markings according to customer specifications

High volume capacity thanks to standard assembly processing at all main

HUBER+SUHNER production sites worldwide

# LISCA – RF jumpers

## Standard LISCA assemblies

These assemblies are produced under stringent quality manufacturing standards in order to achieve consistent high performance. All standard products are based on SUCOFEED cables with black PE jacket material. The assemblies are 100 % tested for attenuation and return loss according to the technical data. These LISCA products are factory-made cable assemblies and can only be ordered in predetermined lengths.

## Features of standard LISCA

Excellent RF performance  
High RF shielding efficiency  
Low attenuation  
Moisture protection IP68  
High flexibility and small bending radius  
Low, stable intermodulation products

## Customised LISCA assemblies

Strengths of HUBER+SUHNER also include the production of products according to customer specifications. This product line offers additional possibilities for demanding customer wishes based on the LISCA standard requirements, like improved return loss values, even better IM performance, customised labelling or assembly lengths up to 150 m.

## Additional features

Improved return loss values  
– Example: better  $-28$  dB at 2.2 GHz with straight N, 4.3-10 or DIN 7/16 connectors  
100 % factory tested products for intermodulation  
– Example: max.  $-155$  dBc at 1.8 GHz with  $2 \times 20$  W carriers  
Factory tested products on phase length/tolerance and delay time  
Specified for frequencies up to 6 GHz  
Customised marking, labelling and product packaging  
Special connector designs  
Products with lengths up to 120 m  
Flexibility for your network architecture

## Rules for connector 1 and connector 2 description

1. For interface 1 and interface 2: numerical code before letter code (e.g. 716 before N).
2. For connector 1 use lower pattern code (e.g. 11 or 16 if pattern of connector 2 is 21).
3. If both connectors are of right angle, additional information about alignment is required.

## Assembly length: tolerance $\pm 1\%$

# UWP – Universal Weather Protection

The Universal Weather Protection boot from HUBER+SUHNER offers protection for RF connector systems against weather, contamination and corrosion. The most common application involves jumpers installed between antennas and remote radio heads which go through extreme outdoor weather conditions. As compared to tape or boot solutions often requiring tools, the UWP offers an easy to use, reliable and multi cable compatibility in terms of jumper suppliers and cable sizes. Additionally the protection boot is reusable, i.e., in case of network upgrades it can be removed from existing cables and installed on to the new ones.

Universal boot solution for field terminated, factory assembled (Lisca) and existing jumpers For field terminated and factory assembled jumper applications, the boot can be easily installed before terminating the connector on to the cable. The installation of boot is fast and easy.

For applications where customers have existing jumpers on site without boot protection, UWP helps to use the same jumpers by simply sliding the boot over the connectors without any tools and giving full IP68 boot protection.

# UWP – Universal Weather Protection

## Features

- Multi cable brand and size compatible (1/2" and 1/2" flex)
- Fast and easy installation
- No tools or lubricants required
- Reusable
- Waterproof IP68
- UV resistant

## Specifications

Environmental data	
Operating temperature (°C)	-65 to +85
Installation temperature (°C)	-25 to +60
Storage temperature (°C)	-70 to +85
Waterproof degree	IP68 (1 m, 24 hrs, 20 °C)
2011/65/EU (RoHS)	compliant
UV resistance	yes
Flame resistance	UL94- HB
Material data	
Material	Silicon/black
Number of operations	20 matings of boot 2 installations over the connector through back end of boot

## Order information

Part number*	Connector type	Min. neck length „A“ (mm)	Min.-Max. diameter „B“ (mm)	Min.-Max. diameter „C“ (mm)	Weight (g)
62_4310-U0-0-6	4.3-10	14	17 to 19	19 to 21	50.5
62_N-U0-0-20	N	14	13 to 18	N/A	51.1
62_716-U0-0-6	7/16	13	25 to 27	N/A	76.1

# SUCOFEEED – corrugated cables

HUBER+SUHNER SUCOFEEED product range of foam corrugated coaxial cables with suitable stripping tools. The cables have excellent electrical, mechanical and environmental properties for indoor as well as outdoor installations.

The cables promise optimal shielding, low attenuation, low VSWR, remarkable intermodulation performance and flexibility for handling and installation on sites.

SUCOFEEED cables are available as made from copper as well as from aluminium. For the US IBC market plenum rated „h“ cable is part of our corrugated cable proposition.

## **Features**

- Low IM distortion levels
- Low loss
- Flame retardant designs available
- High power capability
- High shielding effectiveness
- UV resistant
- Guaranteed performance up to 3 GHz

## **Benefits**

- High efficient signal distribution
- Excellent for multi-operator DAS
- Economic high performance solution if assembled with Quick-Fit connectors

# SUCOFEEED aluminium – corrugated cables

HUBER+SUHNER SUCOFEEED\_LW is a foam dielectric corrugated coaxial cable designed with an aluminium outer conductor and a copper clad inner conductor. This low weight SUCOFEEED\_LW family is a cost efficient alternative to the copper transmission lines. The performance of the aluminium cables is equivalent to the copper transmission cables. Our FR and UL types provide enhanced flame-resistance and therefore excellent choice for indoor DAS applications.

## **Applications**

- Cost efficient solution
- High efficient signal distribution
- Excellent for multi-operator DAS
- Economic high performing solution if assembled with Quick-Fit connectors

## **Features**

- Light weight
- Electrical performance similar to copper cables
- HUBER+SUHNER connectors are fully compatible with aluminium and copper cables
- Cables with flame-retardant jackets on request

# Flexible RF plenum jumper

## Plenum rated RF assembly with cable Sucoform 122/141/222

HUBER+SUHNER standard plenum jumper with Sucoform cables (SPJ/SM) for applications where optimum VSWR and attenuation combined with low intermodulation products are required. Perfectly designed for connectivity solution for indoor and outdoor DAS and small cell installations, coax-link between antennas and feeder-lines or between components in an active or passive DAS tray.

- Excellent low loss (attenuation/return loss)
- Low PIM
- Small bending radius
- Plenum certified cables
- Excellent shielding performance

# RF cable assembly SPJ/SM

## Standard plenum jumper with Sucoform cables

Cable types	Cable attenuation	Jacket diameter	Bending radius
Sucoform 122 LA Cu CMP	0.66 dB/m @ 2.7 GHz	3.65 mm	min. 5 mm
Sucoform 141 LA Cu CMP	0.61 dB/m @ 2.7 GHz	4.10 mm	min. 8 mm
Sucoform 222 LA Cu CMP	0.41 dB/m @ 2.7 GHz	6.20 mm	min. 25 mm

Connector types	Straight cable plug (male)	Straight cable jack (female)
N	x	x
4.3.10X (HEX.Nut)	x	x
SMA	x	
NEX10	x	

Technical data

Further information	100% tested for return loss, attenuation and PIM Serial product label on each jumper for tracking Stock items in lengths of 0.5 up to 5 m

# Copper – corrugated cables

## **HUBER+SUHNER plenum rated coaxial cable for in-building applications**

SUCOFEEED 1/2" PW is a plenum rated wideband coaxial cable designed to deliver outstanding electrical performance up to 6 GHz and support wireless in-building plenum applications. It maintains compatibility with existing connectors, tools, mounting hardware for easy and convenient installation. This plenum cable has a star-shaped profile extruded low loss dielectric and a solid copper outer conductor which provides excellent RF shielding.

### **Features**

Outstanding electrical performance

- Low attenuation/high power rating

Excellent intermodulation values

Plenum rated

- CMP, ETL listed to UL444, Canadian CSA 22.2/FT6

White plenum jacket with temperature stabilised polymer material

### **Benefits**

Compatible with existing field mountable connectors

Minimised system interferences

# Copper – corrugated cables

# Quick-Fit coaxial connectors

---

---

HUBER+SUHNER Quick-Fit connectors are worldwide approved connectors for foam dielectric corrugated tube cables. They offer a greatly simplified and economic approach to cable preparation and assembly. The product line meets the requirements of multi-carrier, high-channel-count transceivers such as base stations of today's mobile communication infrastructure networks.

## **Features**

Excellent RF performance

Low, stable and reproducible IM (Passive InterModulation) – typically  $-155$  dBc

Safe assembly process performance – in-field termination with reproducible electrical performance

Quick and easy assembly – 2 main connector parts, 4 steps in less than 4 minutes

High IP rating – IP68

Multi-brand, multi-design and multi-material cable compatibility

# Quick-Fit coaxial connectors

# Spuma – flexible, low-loss RF cables

The Spuma product family provides highly flexible cable solutions and stands for its extremely low loss. These cables are free of halogen and offer excellent electrical performance, especially an outstanding return loss (VSWR). HUBER+SUHNER Spuma cables are designed for applications up to 6 GHz and offer great opportunities in different industries, including railway, defense, communication and others. Spuma products can also be used as drop-in replacement for LMR® (LMR® is a brand of Times Microwave Inc.).

## Features

- Very low loss up to 6 GHz
- LSFH (flame retardant) types
- Excellent return loss (VSWR)
- High flexibility

# Spuma – flexible, low-loss RF cables

## Spuma

### Attenuation

Typical values at 20 °C ambient temperature and sea level

### CW power

Max. values at 40 °C ambient temperature and sea level

# Spuma – flexible, low-loss RF cables

## Portfolio overview

Spuma + Spuma FR

# Lightning protectors

---

---

Four decades of experience in developing and manufacturing coaxial lightning EMP and NEMP protectors are the foundation of the current HUBER+SUHNER RF-protection portfolio. Our products are designed to meet the stringent requirements of the RF/microwave, telecommunications and wireless industry and cover civil, security and defense applications. An extensive high-voltage impulse laboratory has been established to verify our designs in accordance with the valid international lightning, surge and NEMP standards. Important inventions are covered by worldwide patents.

## **Features**

- Broadband designs
- Excellent RF performance
- High lightning current handling capability
- Low residual energy
- PIM optimised
- High CW and PIP power rating

## **Benefits**

- Elevates system availability
- Lowers operational risk
- Lightning protectors perform the same before and after rated lightning pulses
- Best suited for outdoor installations
- Easy installation

# How to select the right protector

## Application

- Quarter wave lightning EMP protectors for high power and low PIM applications without DC continuity
- Broadband gas discharge tube (GDT) protectors for single channel or low power applications with DC continuity
- Hybrid GDT protectors for multiple channel, high power and low PIM applications with DC continuity
- Hybrid GDT protectors with bias-T to support active electronics with DC on top of the mast
- Optimised for outdoor installations

## Important decision criteria

To find the most appropriate lightning EMP protector we guide you through the following list of criteria to evaluate the specific application requirements.

The first four evaluation criteria items are the most important.

1. DC continuity for powering of remote equipment  
DC supply voltage
2. Frequency range  
Operating band  
AISG band  
Telemetry band
3. Passive intermodulation requirements
4. RF power maximum  
Continuous wave  
Peak power
5. Protection requirements  
Surge current handling capability  
Residual pulse energy/voltage
6. RF requirements  
Return loss (RL)  
Insertion loss (IL)
7. Connector interfaces
8. Mounting/grounding requirements  
Bulkhead mount  
Screw mount
9. Environmental requirements  
IP rating
10. Material requirements
11. Selection of the gas discharge tube for GDT lightning EMP protectors according the RF power

These criteria shall be considered with the provided selection flow chart next page. Product details are listed in this catalogue and further information can be found on the related product detail specification/data sheet.

For any support contact HUBER+SUHNER, [hubersuhner.com](http://hubersuhner.com) or your local representative.

# Selection flow chart for HUBER+SUHNER lightning protectors

## Notes

- 1 DC continuity                      DC can be supplied on the centre conductor for remote powering
- 2 Limited bandwidth                no broadband operation only specific frequency bands can be transmitted
- 3 High RF power                      application with more than 1 kW (CW) transmission power
- 4 Very low RF power                 application with less than 50 W (CW) transmission power
- # No protector solution available featuring broadband operation and low PIM
- \* Specific GDT has to be selected according to the transmitted RF power and DC supply voltage

# Lightning protectors

## Gas discharge tube (GDT)

The best fitting gas discharge tube (GDT) can be selected according to the applied continuous RF power. If a DC signal is superimposed on the RF transmission line follow the guidelines given in the lightning protection catalogue. IP67 rated.

Type no.	Item no.	$U_{Zstat}$	$U_{Zdyn max.}$	$I_s 8/20 \mu s$	$I_{SG} 8/20 \mu s$	$U_{ARC}$	Dim. (mm)

## Self-extinguishing gas discharge tube with automatic recovery (Semper)

### Features and benefits

Self-extinguishing gas discharge tube with automatic recovery

Extinguishing under any coaxial line condition including:

- Malfunction of electronic fused DC supplies
- Malfunction of RF line monitoring
- Absence of any such mechanism

Can be employed for any HUBER+SUHNER GDT protector with exchangeable gas tube

Field replacement allows cost-effective system upgrades

Product options ensure availability for any application

Higher safety

Negligible system downtime

### Sectional view of Semper GDT module

# Grounding kits and accessories

We offer a large selection of advanced products, which are rich in exclusive features and highly appreciated by the operators of leading companies in the sector because we provide total fastening safety along with practical and easy mounting.

# Grounding kits and accessories

## Grounding kits

### Application

HUBER+SUHNER series 9076 grounding kits enable reliable grounding of today's usual corrugated copper tube and RG cables for radio transmitter antenna installations.

### Features

- Quick and easy installation
- No loose piece parts
- Low contact transition resistance (1 mΩ max.)
- Grounding cable AWG6 (16 mm<sup>2</sup>)
- Current handling capability 100 kA 8/20 μs, 25 kA 10/350 μs
- Waterproof IP67
- Corrosion resistant

### Material data

Component part	Material
Metal mounting parts	stainless steel
Contact part	copper
Gasket	EPDM

## Grounding kit N-style

Straight grounding cable connection  
Right angle to corrugated copper tube cable

HUBER+SUHNER type	Item no.	For cable size Sucofeed, Andrew, Nokia, Kabelmetal, RFS, Eupen, etc.	A (mm)	B (mm)	C (mm)	Stripping length	Grounding screws
9076.99.N012-50	84124423	1/2"	500	50	32	26	M8
9076.99.N013-50	84124422	1/2" highflex	500	50	32	26	M8
9076.99.N078-50	84069990	7/8"/7/8" highflex	500	50	44	26	M8

<sup>1)</sup> Including 3/8" highflex

# Grounding kits and accessories

## Grounding kit P-style

Parallel grounding cable connection  
 Aligned to corrugated copper tube cable

HUBER+SUHNER type	Item no.	For cable size Sucofeed, Andrew, Nokia, Kabelmetal, RFS, Eupen, etc.	A (mm)	B (mm)	C (mm)	Stripping length (mm)	Grounding screws
9076.99.P012	23011466	1/2"	840	50	32	26	M8
9076.99.P013	23012649	1/2" highflex	840	50	32	26	M8
9076.99.P014	23015054	1/4", RG_213/214 <sup>1)</sup>	840	50	28	26	M8
9076.99.P038	23012650	3/8"	840	50	28	26	M8

<sup>1)</sup> Including 3/8" highflex

## Stripping dimensions

Concerning the necessary cable jacket length which has to be removed, refer the tables above, column „stripping length“. Select according to type number.

The mounting instruction is shipped with every kit.

# Grounding kits and accessories

## Cold shrink tubes for additional protection

This special cold shrink tube reliably protects coaxial connectors against humidity and harsh environmental influences like icy conditions or a polluted atmosphere. It especially allows for outdoor feeder line installations in mobile communications and other wireless systems.

The simple and fast assembly of this cold shrink tube, by pulling out the supporting spiral, enables a reliable installation without special tools. After the assembly the cold shrink tube provides reliable protection by its continuous radial contact pressure.

### Features

- Quick and easy installation without tool
- No torches or heat required
- Accommodates a wide range of cable sizes
- Good thermal stability
- Resists acids and bases, ozone and UV radiation
- Water resistant
- Application temperature (shrinking process)  $-20\text{ }^{\circ}\text{C}/+ 50\text{ }^{\circ}\text{C}$
- Working temperature  $-20\text{ }^{\circ}\text{C}/+ 130\text{ }^{\circ}\text{C}$

<sup>1)</sup> At temperature below 0 °C shrinking process can be supported by hand warmth.

# Power splitters

---

---

The RF power splitters are low loss reactive splitters for the distribution of RF signals to radio transceiver antenna systems and radiating cables. The RF power is equally distributed to all outputs with excellent amplitude and phase balance.

A broad range of power splitters with N and DIN 7/16 connectors has been designed to split even high power multi-carrier signals of all existing mobile phone systems. Multiband units simplify logistics for OEMs and multi-system operators.

# Power splitters

## N types with frequency range 694 to 3800 MHz

<b>Type no.</b>	<b>5502.17.0050</b>
Item no.	85029265
Split	2 way
Frequency	694 to 3800 MHz
Input port	N female
Output port	N female
Return loss (input)	min. 20 dB
Insertion loss	max. 0.2 dB
PIM at 2 × 43 dBm carrier power	< -161 dBc
Average power	300 W
IP rating	IP67
Operating temperature range	-35 to +85 °C/-31 to +185 °F
Weight	0.21 kg
Mounting hardware	2 clips supplied

## N types with frequency range 380 to 2700 MHz

<b>Type no.</b>	<b>5501.17.0030</b>	<b>5501.17.0031</b>

## DIN 7/16 types with frequency range 694 to 3800 MHz for LTE

<b>Type no.</b>	<b>5501.31.0020</b>
Item no.	85075304
Split	2 way
Frequency	380 to 2700 MHz
Input port	4310 female
Output port	4310
Return loss (input)	min. 17 dB
Insertion loss	typ. 0.1 dB
PIM at 2 × 43 dBm carrier power	-161 dBc
Average power	300 W
IP rating	IP67
Operating temperature range	-40° to +85°
Weight	0.65 Kg
Mounting hardware	2 clips supplied

## DIN 7/16 types with frequency range 380 to 2700 MHz

<b>Type no.</b>	<b>5501.31.0030</b>
Item no.	85075306
Split	3 way
Frequency	380 – 2700 MHz
Input port	4310 female
Output port	4310 female
Return loss (input)	min. 17 dB
Insertion loss	typ. 0.1 dB
PIM at 2 × 43 dBm carrier power	-161 dBc
Average power	300 W
IP rating	IP67
Operating temperature range	-40° to +85°
Weight	0.85 kg
Mounting hardware	2 clips supplied

# High power Low PIM Loads for stationary use

HUBER+SUHNER developed a stepped portfolio of compact Low PIM Loads starting at 30 Watt up to 150 Watt. This provides the flexibility and freedom you need for designing a DAS network. The modularity accommodates economics without compromising quality and performance.

## Application

In a high power wireless infrastructure, the deployment of low PIM components is crucial in regards to the mobile network's availability and service quality.

## Low PIM loads, 50 Ω

HUBER+SUHNER type	Item no.	Interface	Frequency (GHz)	Power (W)	PIM (dBc) <sup>1)</sup>
6530.41.0001	85218440	7/16 female	0.69 to 2.7	30	≤ -160 (typ. -165)

<sup>1)</sup> Two-tone test at 2 x 43 dBm/2 x 20 W carrier

## Adaptors

These low PIM adaptors have been specially developed for IBC/DAS/small cell grade applications where passive intermodulation requirements are crucial.

## Intermodulation adaptors, 50 Ω

# Low PIM T+M grade components

To improve or guarantee the data throughput or the system capacity in existing or new cell site networks it is vital to have access to precise test and measurement grade components which guarantee accurate and stable test results.

HUBER+SUHRNER offers high performance adaptors for specific test and measurement tasks for analyzing cell site installations. The adaptors allows to accurately measure passive intermodulation (PIM) performance.

The components, such as adaptors, intermodulation standards, loads and test leads, offer a perfect range of complementary accessories to support the latest generation of portable PIM test equipment.

# Low passive intermodulation adaptors

These low PIM adaptors have been specially developed for T+M grade applications in intermodulation test setups in the field where passive intermodulation requirements are crucial.

## Features

- Outstanding intermodulation performance
- Non magnetic materials
- Excellent electrical contacts
- Reliable and repeatable intermodulation measurements

<sup>1)</sup> Two-tone test at  $2 \times 43$  dBm/ $2 \times 20$  W carrier

# Passive intermodulation standards

Intermodulation standards are special adaptors which generates intermodulation products of a certain preset level. They are used to verify intermodulation test benches for an instant and/or long-term level stability monitoring. If the third-order intermodulation value, displayed by the test instrument, deviates from the specified value of the intermod standard, it indicates a general measurement uncertainty which may be caused by the test set-up rooting in one or several component or interconnection PIM sources.

## Features

- High repeatability
- Each item delivered with measurement protocol
- Verification traceability via serial number

# TL-P – high flexible PIM test lead

HUBER+SUHNER TL-P product line is developed for indoor and outdoor applications where passive intermodulation (PIM) and return loss (RL) has to be tested. Its excellent PIM and RL performance makes this assembly perfect for the use in Test+Measurement applications. TL-P is based on a flexible cable which is optimised up to 4 GHz and protected with a steel armouring. The robust design is completed with a moulded protection between connector and cable. Field use requires flexible and ruggedised test equipment. TL-P is specially designed for this environment.

## Features

- Highly flexible, tough and reliable design
- Designed for high mating cycles (> 2000)
- Produced under stringent manufacturing and quality standards
- Factory-made cable assemblies

# TL-P – high flexible PIM test lead

## Specifications

# Cell site connectivity

# Solving network densification challenges in the X-haul

---

## Deploying 5G and 4G

Across the world the rollout of the 5G network has started with mobile operators offering enhanced mobile broadband (including fixed wireless access) services. However, in many areas the mobile fiber network infrastructure already is at its maximum capacity even without the addition of 5G. To make things even more complicated, the requirements for capacity increase solutions is extremely diverse. In a mobile fiber infrastructure network there are hardly two sites a like where the capacity increase solutions need to be placed. Available space and power, humidity and temperature resilience, available fiber strands and number of required services to name only a few.

The HUBER+SUHNER optical access solution portfolio is specifically designed to cover these diverse requirements.

---

## Active and passive transport

Both active and passive transport solutions have their advantages. Depending on the application and location either one could be the better suited than the other. This is exactly why the HUBER+SUHNER portfolio includes both. Even more so, the passive and active solutions are designed in such a way that they can easily be combined having an active device on one side and a passive on the other side of the transport link.

---

## Simple upgrade path

The HUBER+SUHNER optical access portfolio at the core is based on WDM both for the active and passive solutions. WDM offers some great advantages over other optical transport and capacity increase technologies. Two of the biggest advantages are the possibility to grow as you pay and a cost effective upgrade path for future technologies.

---

## Future proof

Despite the first 5G deployments having happened, there are still many uncertainties when it comes to 5G and what is to come. This is especially the case when it comes to the additional 5G services massive machine type communication (mMTC) and ultra-reliable and low-latency communication (uRLLC). For these services to make commercial sense for both operators and customers, converged 5G/4G front-, mid- and backhaul networks will become a necessity. The uncertainties hereby are the protocols that need to be supported (eCPRI, O-RAN, nFAPI, etc.) as well as timing and synchronisation requirements within the network (TSN, PTP, etc.).

As the HUBER+SUHNER optical access portfolio is based on WDM and the active solutions remain on the OSI layer 1, the above mentioned will pose no challenge.

# The CUBO advantage

## Why the HUBER+SUHNER Cube Optics active transport solution is a good choice:

- **Maximise existing fiber installation →**

Using DWDM the capacity of a pair of fibers can be easily increased to 48 times the capacity and more.

- **Truly vendor agnostic →**

As the active transport solution is based on a layer 1, it is completely transparent for any underlying layers and therefore is transparent for any vendor specific protocols.

- **Fast deployment →**

The active solution is specifically designed to keep installation and configuration time to the bare minimum.

- **5G and 4G hybrid operation →**

Due to WDM, any types of signals can be combined.

- **Future proof →**

The modular concept combined with the flexibility of WDM allows for a simple upgrade with future modules.

- **Designed and made in Europe →**

The active solutions are designed and manufactured in Germany and Spain.

# CUBO systems

## Small cell application example

The transponding multiplexer can be used in various scenarios. One of them is a hub/spoke setup for small cell applications using a combination of CUBO rack and outdoor units with transponding multiplexer modules.

## Macro cell application example

Another scenario for which the transponding multiplexer in conjunction with the terminal multiplexer are an ideal combination is a macro site to CO / edge site setup. Both are placed in the CUBO rack chassis.

# HUBER+SUHNER network cubes

HUBER+SUHNER Cube Optics has specialised on optical wavelength division multiplexing. We offer all types of optical muxes, ranging from simple wideband WDM over coarse WDM to dense WDM. We are able to combine the different WDM grids and/or cascade several muxes in order to create optimal solutions suitable to each customer's needs.

We are very much aware, that each customer has a specific background and therefore a unique network architecture. In order to suite individual needs, we have products that are aimed for point to point or ring deployments (OADMs), that mix and match specific lambdas of different grids or use band splitters in order to allocate more than one wavelengths to certain locations.

Most customers will find products in the following pages covering their needs, but we encourage you to give us the chance to come up with a customised solution for your needs.

# Network cube

## Features

Types of modules offered:

- 1310/1550 wideband Mux and Demux
- Mux and demux modules, up to 48 channels, cascadable
- OADM modules, 1, 2 or 4 channels
- Further modules on demand

Suitable for CPRI/OBSAI, Ethernet

Other functions, e.g. integrated taps, band splitter, WWDM, multimode versions etc. on demand

Your choice of adapter: SC, LC, E2000, MU etc.

Private labeling and customisation on demand

For 19" or ETSI racks, adaptable to 23"

For central office or outside plant as well as line cards for sub-rack mounts

Also available in WDM splice enclosures or in splice trays of various brands

Fully RoHS compliant

## Ordering information

Description	Insertion loss (dB) <sup>1)</sup>		Product family	
<b>CWDM modules (for 1 slot of the WDM modular shell)</b>				
CWDM 4 channel mux and demux for bi-directional data transmission over two fibers. • CWDM channels: 1510, 1530, 1550, 1570 nm	Max.: Typ.:	<b>CWDM</b> < 2.4 1.6	CWDM-MUX-4 C-1643_Rev.A	
CWDM 4 channel mux and demux with EXP band ports for bi-directional data transmission over two fibers. • CWDM channels: 1470, 1490, 1590, 1610 nm • EXP/express band: 1504 to 1578 nm, for later upgrades or "grey" 1550 nm transceivers	Max.: Typ.:	<b>CWDM</b> < 2.5 1.8	<b>Exp</b> < 2.5 1.5	CWDM-MUX-4+EXP C-1705_Rev.A
CWDM 8 channel mux and demux for bi-directional data transmission over two fibers. • CWDM channels: 1470, 1490, 1510, 1530, 1550, 1570, 1590, 1610 nm	Max.: Typ.:	<b>CWDM</b> < 2.8 2.2	CWDM-MUX-8 C-1640_Rev.A	
CWDM 8 channel mux and demux for bi-directional data transmission over two fibers. • CWDM channels: 1270, 1290, 1310, 1330, 1350, 1370, 1390, 1410 nm	Max.: Typ.:	<b>CWDM</b> < 2.8 2.2	CWDM-MUX-8 C-1939_Rev.A	
CWDM 8 channel mux and demux with 1310 band ports for bi-directional data transmission over two fibers. • CWDM channels: 1470, 1490, 1510, 1530, 1550, 1570, 1590, 1610 nm • 1310/WWDM band: 1260 to 1360 nm for "grey" 1310 nm transceivers	Max.: Typ.:	<b>CWDM</b> < 3.6 1.7	<b>WWDM</b> < 1.2 0.7	CWDM-MUX-8+1310 C-1651_Rev.B
CWDM 8 channel mux and demux with UG band ports for bi-directional data transmission over two fibers. • CWDM channels: 1470, 1490, 1510, 1530, 1550, 1570, 1590, 1610 nm • UG/upgrade band: 1260 to 1438 nm, for later upgrades or "grey" 1310 nm transceivers.	Max.: Typ.:	<b>CWDM</b> < 3.6 2.5	<b>UG</b> < 1.2 1.2	CWDM-MUX-8+UG C-1678_Rev.C

<sup>1)</sup> Insertion loss over channel bandwidth, valid over full operating temperature range and all states of polarisation with optical connectors.

The typical connector loss is 0.4 dB for a pair of connectors.

<sup>1)</sup> Insertion loss over channel bandwidth, valid over full operating temperature range and all states of polarisation with optical connectors.

The typical connector loss is 0.4 dB for a pair of connectors.

# Network cube

## Splice enclosures

A lot of above shown multiplexing configurations are available in splice enclosures. We provide either the fully assembled enclosure ready for installation on the trays with muxes to be integrated on site in your enclosure. This is available for a wide range of enclosure brands on the market.

### Features

- Miniature WDM qualified for damp heat, temperature cycles, shock and vibration in accordance with Telcordia GR1221 uncontrolled environment standard and the GR1209 moisture cycling standard
- Multiplies capacity of point-to-point links within existing hand hole, pole pod or curb-side cabinet nodes
- Splice trays delivered ready for mounting and splicing
- Integrates WDM into a variety of major brands of infrastructure equipment such as 3M and others
- Fully RoHS compliant

## Customised form factors

So far shown multiplexing functionality can also be integrated into other form factors to accommodate specific customer needs. Those special requirements can be e.g. outdoor enclosures, higher density or a combination of one of functionalities in one mechanical housing.

HUBER+SUHNER Cube Optics has optimised it's production and supply chain to accommodate such requirements and being able to deliver also small series of WDM products according to special customer requests within a short period of time.

# MASTERLINE Ultimate WDM (MLU WDM)

## Features

- Connector head with integrated fully passive CWDM or DWDM modules for various outdoor applications
- Facilitate quick network upgrade when it comes to fiber exhaust
- CWDM wavelength ranges in accordance with ITU standard G.694.2
- DWDM wavelength ranges in accordance with ITU standard G.694.1
- Tested in accordance with Telcordia GR-1209/1221
- Available with 6 or 12 Q-ODC sockets with consecutive WDM channels

## Specifications

Please find general specification on page 26

Optical specifications CWDM		MLU WDM 12	MLU WDM 6
Operating wavelength range		1260 to 1620 nm	1460 to 1620 nm
Operating channels		C1 – C12	C1 – C16
Optical bandwidth		13 nm	
Insertion loss		< 3.9 dB	
Isolation	adjacent channel	> 30 dB	
	non-adjacent channel	> 40 dB	
Return loss		> 45 dB	
Directivity		> 50 dB	
Polarisation dependent loss		< 0.2 dB	
Max. optical power		< 250 mW	

Optical specifications DWD		MLU WDM 12	MLU WDM 6
Operating channels		C1 – C31	C1 – C25
Channel spacing		100 GHz	
Insertion loss		< 4.3 dB

## LOGICAL SETUP

# Integrated network cubes

Today, optical multiplexing is a widely spread procedure within fiber optic installations. It's the ideal technology to maximise the fiber capacity as it combines multiple optical signals into a fiber strand.

Normally the form factor of optical multiplexers are based on a 19" chassis system. This is fine for installations within data centers or other indoor locations with vast amounts of rack space available.

However, nowadays the likelihood of having enough rack space is more than slim resulting in the necessity for compact solutions wherever possible, including the multiplexer solutions. In addition optical multiplexing is also required in other installations without 19" chassis mounting as well as for applications in outdoor environments.

The integrated network cubes are specifically designed for these challenges and combine innovative fiber management systems, wall box systems and outdoor enclosures with state of the art WDM technology.

The enclosures used for the integrated network cubes are among others the highly acclaimed HUBER+SUHNER fiber management systems IANOS and LISA, the wall boxes Optibox and the MASTERLINE Ultimate products. The WDM technology is based on the state of the art HUBER+SUHNER Cube Optics network cubes.

# Integrated network cubes

Integrated network cubes: A combination of state of the art multiplexer and innovative enclosures

## WDM grid options

Optical multiplexing has been standardised in two grids, CWDM and DWDM

<b>CWDM</b>	<b>18 Channels</b>																	
Wavelength	1271	1291	1311	1331	1351	1371	1391	1411	1431	1451	1471	1491	1511	1531	1551	1571	1591	1611
<b>DWDM</b>														<b>100+ Channels</b>				

- CWDM Coarse Wavelength Division Multiplex (18 channels)
- DWDM Dense Wavelength Division Multiplex (100+ channels)
- Upgrade port Most multiplexers don't cover all available channels. The upgrade port allows the addition of any of the missing channels both for CWDM and DWDM multiplexer.
- 1310 port The 1310 port enables the addition of a wideband „gray“ wavelength and can be combined with any DWDM multiplexers or CWDM multiplexers using the top half of the grid channels.

# Integrated network cubes

## WDM types

Type	Schematic	Description
Mux		<p><b>Dual Fiber Optical Multiplexer</b></p> <p>Uses two separate fiber connections for transmission (TX) and reception (RX). The number of wavelengths therefore is identical to the number of TX/RX channels.</p>
Mux +UG		<p><b>Dual Fiber Optical Multiplexer + Upgrade</b></p> <p>Uses two separate fiber connections for transmission (TX) and reception (RX). These multiplexers have a dual fiber upgrade port, which allows the addition of fiber channels that are not already covered by the multiplexer.</p>
Mux SF		<p><b>Single Fiber Optical Multiplexer</b></p> <p>Requires a single fiber for both transmission (TX) and reception (RX). The number of required wavelengths therefore is double the number of TX/RX channels.</p>
Mux SF +UG		<p><b>Single Fiber Optical Multiplexer + Upgrade</b></p> <p>Requires a single fiber for both transmission (TX) and reception (RX). These multiplexers have a single fiber upgrade port, which allows the addition of fiber channels that are not already covered by the multiplexer.</p>
OADM		<p><b>Dual Fiber Optical Add Drop Multiplexer</b></p> <p>East and West connection each uses a separate fiber for transmission (TX) and reception (RX). The number of add/drop channels is identical to the number of wavelengths.</p>
OADM SF		<p><b>Single Fiber Optical Add Drop Multiplexer</b></p> <p>East and West connection each only require a single fiber for TX and RX. The number of add/drop channels therefore is double the number of wavelengths.</p>

# IANOS® – Fiber management system

The IANOS® system from HUBER+SUHNER is a state-of-the-art fiber optic management system which facilitates fast, flexible and future-proof connectivity in the data center. It is made up of IANOS chassis (multiple versions and sizes available) and IANOS modules.

Data centers are constantly adapting to reflect the demands placed on them, and today's fiber management systems need to accommodate these changes with the minimum amount of cost, time and disruption.

As data centers evolve, we see a broad mixture of applications depending on the location, the business model and of course the data demand. IANOS accommodates these changes by offering the widest range of connectivity scenarios in a single generic platform.

Many of these data center applications require optical multiplexing. Instead of having separate multiplexing units, the IANOS modules with integrated HUBER+SUHNER Cube Optics network cubes are an ideal and space saving solution.

The IANOS modules come in two sizes, a single and a double width module. The single width module accommodates 6 LC duplex connectors whereas the double width module accommodates 12 LC duplex connectors. Depending on the type of network cube and number of channels either the single or double module is used.

Enclosure specification		
Type	Single module (S)	Double module (D)
Connectors	6 × LC duplex	12 × duplex
Dimensions (W×H×D)	97 × 12 × 172 mm 3.81 × 0.47 × 6.77 in	196 × 12 × 172 mm 7.71 × 0.46 × 6.77 in

Chassis	Compatible with IANOS® EDR 1U/4U and EDR zero space chassis	

# IANOS® – Fiber management system

## Compatibility matrix

The integrated network cube concept is extremely flexible allowing a wide range of combinations in different enclosures. However, there are limitations due to space within the enclosure and number of available fiber connections. At the same time it for example doesn't make sense to have a Network Cube with only a small number of channels in a large enclosure. The following compatibility matrix gives an overview of what WDM type and grid combination is available for the IANOS® system.

		Mux-2	Mux-2 +UG	Mux-3	Mux-3 +UG	Mux-4	Mux-4 +UG	Mux-8	Mux-8 +UG	Mux-8 +1310	Mux-16	Mux-8 2F (Dual)	Mux-1 SF	Mux-2 SF	Mux-2 SF +UG	Mux-3 SF	Mux-3 SF +UG	Mux-4 SF	Mux-4 SF + UG	Mux-6 SF	Mux-8 SF	OADM-1	OADM-2	OADM-3	OADM-4	OADM-1 SF	OADM-2 SF	OADM-3 SF	OADM-4 SF

# LISA – fiber management system

LISA is a dedicated high-density fiber management system commonly used as a centralised cross-connect in the main distribution area (MDA) of large data centers. With a 300 mm depth and full access from the front side, LISA cabinets can be positioned against unused walls, at the end of cold aisles or back-to-back on a single floor tile.

LISA racks have a density of 1500 LC ports per rack or 3000 LC ports per tile when placed back-to-back.

The main difference between LISA and conventional 19" panels is the fact that LISA is fully accessible from the front side.

LISA fiber trays are the side-facing connectivity blocks that are inserted into tray units within high-density CDR racks. Designed for speed of installation and improved accessibility, the LISA fiber trays can be installed and removed in under 10 seconds. Fiber trays are available to cover a wide range of applications. With integrated HUBER+SUHNER Cube Optics network cubes, optical multiplexing applications are available in this very compact and easily accessible system.

The LISA modules are available with 12 or 18 LC duplex connectors. Depending on the type of Network Cube and number of channels either the 12 or 18 LC duplex connector version is used.

Enclosure specification	
Connectors	12 or 18x LC duplex
Dimensions (W×H×D)	288 × 18 × 262 mm (with hinge and patch cord arm) 11.38 × 0.71 × 10.32 in
Rack unit height	0.5U

# Optibox – wall enclosures

The Optibox family of products from HUBER+SUHNER are a range of wall enclosures act as the interface between the optical access network of the service provider (drop cable) and the internal „In-the-Home“ network. A passive connection enclosure at the Building Entry Point (BEP) is used for splicing, routing or connecting fibers.

The Optibox products offer a comprehensive enclosure portfolio to address a large variety of applications. From large buildings such as multi-dwelling units (MDU) to single family homes, with patching, splicing and splitting capabilities, the Optibox family satisfies the most demanding applications.

Combined with the integrated HUBER+SUHNER Cube Optics network cubes, the Optibox product range is the ideal solution for a wide range of additional applications.

Depending on the type of network cube and number of channels the best suited Optibox is used.

Enclosure specification		
Optibox 4		
Connectors	4x LC duplex	
Dimensions (WxHxD)	150 x 250 x 46 mm 5.9 x 9.84 x 1.81 in	
Ingress protection	IP54	
Optibox 4i		
Connectors	4x LC duplex	
Dimensions (WxHxD)	150 x 250 x 46 mm 5.9 x 9.84 x 1.81 in	
Ingress protection	IP67

# Optibox – wall enclosures

## Compatibility matrix

The integrated network cube concept is extremely flexible allowing a wide range of combinations in different enclosures. However, there are limitations due to space within the enclosure and number of available fiber connections. At the same time it for example doesn't make sense to have a network cube with only a small number of channels in a large enclosure.

The following compatibility matrix gives an overview of what WDM type and grid combination is available for the Optibox enclosures.

# MASTERLINE Classic – FTFA box

The MASTERLINE Classic FTFA Boxes are mainly designed for remote radio installations. These ruggedised outdoor Fiber-To-The-Antenna (FTFA) boxes are a cost effective method for an effective and flexible installation for mobile networks. Usually, a multifiber riser cable is connected to the mast mounted FTFA distribution box which is then linked to the remote radio heads with short jumper cables.

For the integrated network cubes the MASTERLINE Classic FTFA box medium is the perfect choice. The compact size, together with the IP67 ingress protection makes this integrated network cube ideal for a wide range of indoor and outdoor applications.

Especially for centralised radio access networks using passive fronthaul to the cell sites, the integrated network cube based on the MASTERLINE Classic FTFA box medium is a good choice, as it combines all features required by this application.

Enclosure specification	
<b>Connectors</b>	18x LC duplex
<b>Dimensions (WxHxD)</b>	240 x 240 x 132 mm 9.45 x 9.45 x 5.2 in
<b>Material</b>	glass-filled polycarbonate, halogen-free, UV resistant
<b>Flammability rating</b>	UL 94 V0
<b>Ingress protection</b>	IP67
<b>Impact resistance</b>	IK 07 (EN 62262)

# HUBER+SUHNER pluggable transceiver

HUBER+SUHNER provides a full range of pluggable optical transceivers, approx. 2000 different types available, all compatible to MSA standard.

We are covering all major protocols and data rates (most importantly Ethernet and CPRI/OBSAI up to 100 Gbps). Our transceivers are available grey (850 nm MM/1310 nm SM/1550 nm SM) or coloured CWDM and DWDM, supporting MMF or SMF fiber at multiple power budgets to cover different distances.

The CUBO transceivers are compatible with all common active equipment, such as BBU/RRH and other small cell equipment.

# Transceiver

## 2 core power supply cable PVC jacket material, UL listed (TC-ER)

### Features

- Compliant with SFP/SFP+/QSFP(28) MSA
- Data rate up to 100 Gbps
- Transmission distance up to 160 km
- Low power consumption
- Extreme reliability
- All major codings available without surcharge
- RoHS 6/6 compliant
- Laser class 1 IEC-60825 compliant
- Case operation temperature range:
  - Commercial: 0 to 70 °C
  - Industrial: -40 to 85 °C
- Applications: Ethernet, CPRI/OBSAI, eCPRI

## Typical transceiver used for wireless application

All industrial temperature (-40 to +85 °C operating), uncoded and including DMI

Form factor	Media	Protocol	Data rate	Distance
SFP	CWDM (1270 to 1610 nm)	Ethernet, CPRI 2	up to 1.25G	40 km
SFP	CWDM (1470 to 1610 nm)	Ethernet, CPRI 2	up to 1.25G	80 km
SFP	DWDM (ch17 – ch61)	Ethernet, CPRI 2 – 3	1.25G and 2.5G	80 km and 120 km
SFP	1310 nm (LX)	Ethernet, CPRI 2	up to 1.25G	2+ km ... 40 km
SFP	Bidi (various wavelength)	Ethernet, CPRI 2	up to 1.25G	20 km ... 160 km
SFP	850 nm (SX) MM fiber	Ethernet, CPRI 2	up to 1.25G	0.5 km
SFP+	1310 nm (LR)	Ethernet, CPRI 2 - 6	up to 6.1G	10 km
SFP+	850 nm (SR) MM fiber	Ethernet, CPRI 2 – 8	up to 10.1G	0.3 km
SFP+	1310 nm (LR)	Ethernet, CPRI 2 – 8	up to 10.1G	2+ km ... 40 km
SFP+	Bidi, 1270/1330 nm	Ethernet, CPRI 2 – 8	up to 10.1G	10 km ... 80 km
SFP+	CWDM (1270 to 1610 nm)	Ethernet, CPRI 2 – 8	up to 10.1G	10 km
SFP+	CWDM (1470 to 1610 nm)	Ethernet, CPRI 2 – 8	up to 10.1G	40 km and 80 km
SFP+	DWDM (ch17 – ch61)	Ethernet, CPRI 2 – 8	up to 10.1G	40 km and 80 km
SFP28	1310 nm (LR)	Ethernet, CPRI 10	up to 25G	10 km
SFP28	Bidi 1270/1310 nm	Ethernet, CPRI 10	up to 25G	10 km ... 30 km
SFP28	DWDM c-Band	Ethernet, CPRI 10	up to 25G	10 km ...15 km
QSFP28	1310 nm (LR4)	Ethernet	up to 112G	10 km
QSFP28	1310 nm (eLR4)	Ethernet	up to 103G	25 km

# Transceiver selection guide

Selecting the right transceiver can be a challenge due to the wide range of available products. For HUBER+SUHNER to be able to propose the one transceiver to match the application and hardware, all below stated parameters A-E have to be determined and specified. Only with a complete set of parameters can we propose a suitable transceiver for a specific enquiry.

## **A Transceiver type "form factor"/MSA type**

The transceiver has to mechanically and electrically fit into a given active equipment. Transceiver MSAs define mechanical form factors including electric interface as well as power consumption and cable connector types.

SFP/SFP+

## **B Protocol and data rate**

Different switch/router support different protocols and data rates.

CPRI: Rate 1 (0.6 G/s), Rate 2 (1.2 G/s), Rate 3 (2.5 G/s), Rate 4 (3.0 G/s), Rate 5 (4.9 G/s), Rate 6 (6.1 G/s), Rate 7 (9.8 G/s)  
Ethernet: Gigabit Ethernet, 10 GE

## **C Power budget**

The transceiver power budget is the difference between laser launch power and receiver sensitivity and has to be 2 to 3 dB larger than the measured link loss. If the link loss cannot be measured it has to be calculated by adding up individual losses: transmission distance (km) + fiber type (or OTDR trace), number of ODFs, patches, splices, passive optical components (e.g. splitter and muxes) and other sources of loss have to be known. Please state all individual losses.

Power budget (dB)

common values are < 10, 14, 20, 24, 28, > 30

## **D Transport media/transceiver "colour"**

What transport media will be used: copper, single mode fiber (SMF), multimode fiber (MMF).

If SMF is used what is the optical transmission spectrum: "grey" (wide 1310/wide 1550 nm) or "coloured" (CWDM or DWDM).

If CWDM or DWDM shall be used, channels need to be specified.

850 nm MM/1310 nm grey/1550 nm grey/CWDM (1270 to 1610 nm)/DWDM (100 GHz ch 17 to 61)/  
Bi-Di (please specify wave-length pair)

MM = Multimode/all others are single mode.

## **E Equipment compatibility/"coding"**

In what switch/router is the transceiver supposed to work. Is the equipment "open for 3rd party transceivers" or "vendor locked".

IOften switch/router is vendor locked, so, the transceiver has to be coded to be accepted by the equipment.

Therefore switch/router brand and model must be known (e.g. Cisco Catalyst 8500)

In case switch/router open for 3rd party transceivers, chose uncoded/none

3 Com/Alcatel/Arista/Brocade (pls. differ from Foundry)/Ciena/Cisco/Dell/Ericsson/Extreme/Force10/Juniper/HP/Huawei/

# Timing solutions – GPS over Fiber

As capacity increases, very low latency as well as precision timing and synchronization are needed to ensure closer coordination between cell sites. Limited power infrastructures, coupled with the complexity and time required to install multiple antennas on structural rooftops, are challenging the network expansion. Working with the leading telecommunications company in North America, HUBER+SUHNER developed a game-changing Direct GPS-over-Fiber solution for telecommunication and data center customers in search of scalable timing infrastructure solutions for outdoor remote antenna applications that provide efficient installation, flexible configurations and no need for power infrastructure at the remote end.

The Direct GPS-over-Fiber portfolio offers fast and easy-to-install solutions for timing infrastructure that are compact with integrated transmitters which reduce hardware costs by taking away the need for multiple GPS antennas, can reach longer distances over fiber optic cabling (GPS-over-Fiber) and eliminates the need for costly remote antenna power infrastructure with a copper-free GPS link that uses fiber optic cabling (Power-over-Fiber) to distribute both power and signal.

## Structure

The compact space-saving design of Direct GPS-over-Fiber dramatically reduces the amount of hardware and equipment needed

## Enhance

The ease-of-use benefits of Direct GPS-over-Fiber help free up time for resources to be spent elsewhere.

## Drive

Direct GPS-over-Fiber optimizes ownership and lifecycle costs leaving more capital and

# Portfolio overview

85140587	GPSof4 - 1.5GHz (RX) [LC/PC]	4 SMA	1 LC/UPC	-	Din Rail mount
85134405	GPSof8 (RX)	8 SMA	1 LC/UPC	-	19" 1 RU
85127335	GPSof8 - 1.5GHz (RX) L1+L2	8 SMA	1 FC/APC	-	Din Rail mount
85134363	GPSof16 (RX)	16 SMA	1 LC/UPC	-	19" 1 RU
85145447	GPSof16-2 (RX)	16 SMA	1 LC/UPC	2 LC/UPC	19" 1 RU
85140926	GPSof32 (RX)	32 SMA	1 LC/UPC	-	19" 2 RU

## GPS-over-Fiber antenna

Item-No	Product Description	Frequency range	Power supply
85160014	GNSS ANT L1+L2 3.3 V	L1+L2	3.3 V
85170543	GNSS ANT L1+L2 5 V		5.0 V

## Direct GPS-over-Fiber portfolio

Direct GPS-over-Fiber Transmitter (TX) Module (Optical GNSS Antenna)

Item-No	Product Description	FO Interface	Form factor
85077810	Direct GPSof (TX)	QODC12	Antenna

Direct GPS-over-Fiber Receiver (RX) Modules (O/E Conversion)

Item-No	Product Description	# of RF Inputs	# FO Inputs	# FO outputs	Form factor
85128283	Direct GPSof - MAC8-1 (RX)	8 SMA	QODC12	1 LC/UPC	19" 1 RU

Direct GPS-over-Fiber KITS

Item-No	Product Description (SAP View)	Kit Includes
85134673	Direct GPSof - MAC8-1 Link	85128283 + 85077810

## Additional modules

Item-No	Product Description	# RF/FO Inputs	#RF/FO Outputs	Form Factor
85128403	GPSof Amp Expansion Module 16	1 SMA	16 SMA	19" 1RU
85128404	GPSof Amp Expansion Module 32	1 SMA	16 SMA	19" 2RU
85154296	GPSof - OSM (1x8)	1 LC/UPC	8 LC/UPC	19" 1RU

GPS-over-Fiber Power Unit

Item-No	Product Description	Power Input	Power Output	Form Factor
85152769	Direct GPSof DC/DC Converter	2x -48VDC	2x 12VDC	19" 1RU

# Portfolio overview

## Fiber optic assemblies Q-ODC-12 Riser rated

Item-No	Product Description	Length (ft)	length (m)
85115099	MA12_QOP3_QOP3_A270R_15.2_BB	50	15.25
85115100	MA12_QOP3_QOP3_A270R_30.5_BB	100	30.5
85115101	MA12_QOP3_QOP3_A270R_45.7_BB	150	45.75
85115102	MA12_QOP3_QOP3_A270R_61.0_BB	200	61
85115103	MA12_QOP3_QOP3_A270R_76.2_BB	250	76.25
85115104	MA12_QOP3_QOP3_A270R_91.4_BB	300	91.5
85115105	MA12_QOP3_QOP3_A270R_107_BB	350	106.75
85115106	MA12_QOP3_QOP3_A270R_122_BB	400	122
85115107	MA12_QOP3_QOP3_A270R_137.2_BB	450	137.25
85142046	MA12_QOP3_QOP3_A270R_152.4_BB	500	152.5
85142047	MA12_QOP3_QOP3_A270R_183_BB	600	183
85142048	MA12_QOP3_QOP3_A270R_213.4_BB	700	213.5
85142049	MA12_QOP3_QOP3_A270R_244_BB	800	244
85159918	MA12_QOP3_QOP3_A270R_274.3_BB	900	274.5
85159919	MA12_QOP3_QOP3_A270R_305_BB	1000	305

Note: Q-ODC-12 Plenum rated assemblies are available upon request

## RF cable assemblies

Item-No	Product Description	Interface	Length (ft)	Length (m)
85134446	LIS-C5-11SMA-11SMA-00305-55	SMA (m)	1	0.3
85134447	LIS-C5-11SMA-11SMA-00610-55	SMA (m)	2	0.6
85134454	LIS-C5-11SMA-11SMA-00914-55	SMA (m)	3	0.9
85134452	LIS-C5-11SMA-11SMA-01829-55	SMA (m)	6	1.8
85134450	LIS-C5-11SMA-11SMA-03658-55	SMA (m)	12	3.7
85134449	LIS-C5-11SMA-11SMA-04572-55	SMA (m)	18	5.5
