

Direct GPS-over-Fiber

World's first truly copperless link

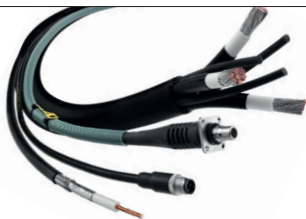

Box builds

Mechanical integration is a key capability that considers product and application requirements. HUBER+SUHNER is able to add value by streamlining the integration process, while ensuring superior quality and performance.

Application-specific options

HUBER+SUHNER is a leading global provider of RF, FO and LF cables and components. With our experience, product knowledge and application know-how, we support our customers by offering solutions that add the most value to their applications.

Antenna

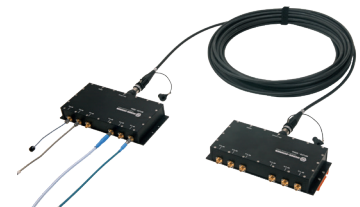

HUBER+SUHNER develops and produces robust and fit-for-purpose antennas that meet specific customer, application and/or industry requirements.

Power-over-Fiber

Power-over-Fiber eliminates power constraints at remote sites by distributing power using existing FO backbones. A game-changer in technology convergence!

RF-over-Fiber

The RF-over-Fiber (RToF) Series enables the use of RF and FO in a single system. Our extensive portfolio covers a frequency range of 100 KHz to 40 GHz and includes RF, GPS and LAN options.

Total cost of ownership

Whether it be in the streamlining of hardware, or the simplification of installation processes, HUBER+SUHNER offers end-to-end connectivity solutions that enhance our customers' bottom line and supports cost reduction objectives.
