

Fiber optic cable systems

Flexible high-density solutions

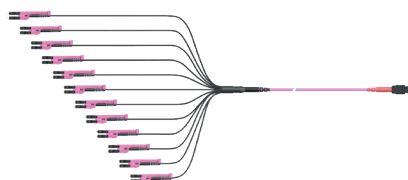

01.2020

Harmonised solutions

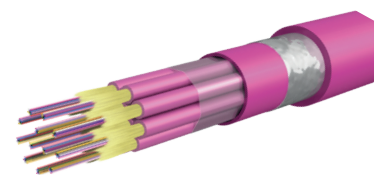

The HUBER+SUHNER cable system portfolio is ideally matched with the entire fiber optics portfolio to deliver end-to-end solutions for different projects and applications.

Customised solutions

With in-house production, HUBER+SUHNER solutions can be customised for each application. Customers can choose different features and constructions which best suit their project needs.

High fiber count

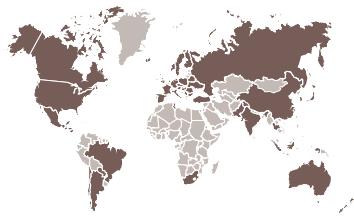

Available in high fiber count constructions with up to 288 fibers, the Optipack cables combine 2 mm or 3 mm sub-units to allow flexible high-density installations at a reduced OPEX.

Connectors and accessories

The vertical integration of HUBER+SUHNER optical solutions, from components to systems, allows cables to be terminated with a variety of connectors and accessories as well as with different combinations such as MTP® to LC or LC to E-2000™.

Availability and global presence

With a global presence in more than 80 countries, HUBER+SUHNER guarantees its customers the fastest availability of products and services as well as best-in-class support at all its locations.

CPR compliance

HUBER+SUHNER complies with the EU regulation 305/2011 EN from 1st July 2017 and offers a wide portfolio of CPR-rated cables in accordance with the regulation.
