HUBER+SUHNER strengthens position in rail and bus antenna market

HUBER+SUHNER takes over the railway and bus antenna portfolio from Kathrein SE (Germany). With this acquisition, HUBER+SUHNER expands its own range of antennas. It thus strengthens its leading market position in connection with the growing need for mobile communication in public transport. The transaction is expected to close in the coming days.

The need for mobile communication in public transport requires uninterrupted and stable high-speed data transmission due to ever new applications and the resulting increase in data volumes. Both HUBER+SUHNER and Kathrein are technological leaders in this market with their antenna solutions and enjoy an excellent reputation.

HUBER+SUHNER acquires the railway and bus antenna portfolio from Kathrein as a rounding-off acquisition for the targeted expansion of its own product range. The annual turnover of the acquired portfolio is in the lower single-digit million range.

The transaction is expected to be completed in the coming days. Both parties have agreed not to disclose any financial details.

This media release is also available on the website under Company/Media. The German version is binding.

HUBER+SUHNER Group

HUBER+SUHNER is a global company with headquarters in Switzerland which develops and manufactures components and system solutions for electrical and optical connectivity. With cables, connectors and systems – developed from the three core technologies of radio frequency, fiber optics and low frequency – the company serves customers in the communication, transportation and industrial sectors. The products deliver high performance, quality, reliability and long life – even under harsh environment conditions. Our global production network, combined with group companies and agencies in over 60 countries, puts HUBER+SUHNER close to its customers. Further information on the company can be found at hubersuhner.com.
