Declaration of Compliance with RoHS Directive 2011/65/EU

Dear Sir or Madam,

HUBER+SUHNER hereby declares that all products are compliant with the substance restrictions of EU Directive 2011/65/EU for the Restriction of the use of Hazardous Substances in electrical and electronic equipment (RoHS) including the amendment under Commission Delegate Directive (EU) 2015/863.

This declaration is based on the best of our knowledge, acquired through diligent inquiries conducted with our suppliers. It accurately represents our current comprehension derived from the information provided by our suppliers. It is important to acknowledge that this information is subject to potential revisions. It should be noted that this statement does not constitute a quality agreement. Products containing lead are covered by exemption (i.e. 6a, 6aI, 6b, 6bII, 6c, 7a, 7cI). H+S consistently utilizes lead-free soldering materials, unless the use of lead-containing soldering materials is necessitated by specific customer requirements or technical considerations such as products designed for aerospace and defense applications.

The RoHS status of many of our products is listed on data sheets in catalogues or in our product data base (<https://ecatalog.hubersuhner.com>). If you have any questions relating to RoHS compliance of HUBER+SUHNER products, please do not hesitate to contact your nearest HUBER+SUHNER customer service.

Yours sincerely
HUBER+SUHNER AG
